(*b*) *Steel Castings and Spring Steel.*—The Board found that, since its first enquiry, the annual demand for steel castings had sufficiently increased to permit of an economic output. They, therefore, considered that a good case had been made out for protection. They considered that the best and most economical method of extending help to the industry was by means of a bounty and accordingly recommended that on all steel castings manufactured by the Hukumchand Electric Steel Works for railway wagons, underframes and locomotives during the period October 1st, 1927, to September 30th, 1930, a bounty of Rs. 2-8-0 per cwt. should be paid to the Company subject to a maximum of Rs. 1,80,000 for the whole period. Subject to this maximum, no restriction should be placed on the amount to be paid in any one year. No recommendation was made in respect of spring steel as it is not yet manufactured on a commercial basis and no reliable information as to the cost of production had been forthcoming.

(*c*) *Bolts and Nuts.*—The manufacture of bolts and nuts in India is at present on so small a scale that the Board did not consider present costs a guide to the amount of protection required if large scale production were undertaken. There appeared, however, good ground for the removal of the inequality of tariff treatment as between the Indian manufacturer and his foreign competitors which existed under the Tariff Schedule under which high specific duties were charged on the steel bars from which bolts and nuts are manufactured whereas the duty on imported bolts and nuts was only 10 per cent *ad valorem.* The Board, therefore, recommended that, on all bolts and nuts falling under Article 61 of the Statutory Tariff Schedule, a specific duty of Rs. 2 per cwt. should be levied in place of an *ad valorem* duty of 10 per cent.

III. Wire and Wire Nails.—The Board held that as it appeared that wire rod, the main raw material for the manufacture of wire and wire nails, would not be manufactured in India for at least three years and as the debenture holders of the only company manufacturing wire in India, Indian Steel Wire Products, Limited had applied to the Trustees that the Company should be put into liquidation, the industry failed to quality for protection. They, therefore, recommended that the protective duty on wire and wire nails should be discontinued until such time as the manufacture of wire rod in India was established on a commericial scale, when the question might be reconsidered.

Decision of the Government of India.—In a Resolution dated February 25th 1928, the Government of India accepted all the findings of the Tariff Board with the following exceptions. They found themselves unable to accept the recommendation that the maximum price for wagons should be the lowest approved price as shown in the tenders for wagons in November, 1925, and for underframes in April, 1926, plus an addition of 12½ per cent. and the appropriate charges for landing, wharfage, and erection. They considered that this addition would be appropriate only if the total orders to be placed in any one year were sufficient to keep the wagon building firms working to 60 per cent. of capacity and would be too low if the orders fell short of this figure. They, therefore, decided that tenders should in the first instance be called for only in India and the lowest tender should be accepted provided it were regarded as reasonable. Its reasonableness would be determined by comparison with the basic price of 1925 in respect of wagons and that of 1926 in respect of underframes and allowance, would be made either upwards or downwards for variations in steel prices and for the size of the orders to be placed. If the prices tendered were found to be unreasonably high for any type of wagon, the wagon building firms would be informed of the maximum price which the Government of India were prepared to pay and would be given an opportunity of accepting the order at that price. If they were unwilling to do so, simultaneous tenders would be called for in England and in India. In view, however, of the necessity for assisting the industry which arose from the fact that, with simultaneous tenders,

and a 10 per cent duty, there was a serious danger that orders would be lost to Indian firms, the Government of India decided that the rate of duty on wagons and underframes, and their component parts other than wheels, axles, vacuum brakes and certain other component parts which are not made in India, should be raised to the rates applicable to fabricated steel generally *viz.* 17 per cent. *ad valorem* if of British manufacture and 17 per cent. *ad valorem* plus Rs. 15 per ton if not of British manufacture. This increase in duty should have effect for three years only, at the end of which period it should again be possible to place orders on a normal scale. As regards steel castings, the Government of India held that the conditions justifying protection did not exist and were, therefore, unable to accept the bounty scheme recommended by the Board. They pointed out that, in addition to the Hukumchand Electric Steel Works, there was at least one other firm, the Kumardhubi Engineering Works which was equipped to produce steel castings from indigenous materials and that it appeared from the Board's own figures that the effective railway demand was barely sufficient to keep one firm fully employed. With two firms in the field, it would not be possible for either to obtain sufficient orders to bring down costs to an economic level, especially as some of the railways manufacture in part their own requirements.

Legislation giving effect to the Tariff Board's recommendations as modified by the Government of India was introduced in the Legislative Assembly in March 1928. That part of it relating to the increase in the duty on wagons and underframes and component parts was not, however, accepted by the Assembly. The proposals in regard to the imposition of a specific duty of Rs. 2 per cwt. on iron or steel bolts and nuts and the abolition of the protective duty of Rs. 60 per ton on certain kinds of iron or steel wire were passed into law as Act VIII of 1928.

Oil Industry.—The reference to the Tariff Board, in March 1928, of the question of granting protection to the oil industry was the outcome of representations received by the Government of India from a number of Companies engaged in the production of petroleum as to the effect of the price war which was then in progress between the Standard Oil Company of New York and the Royal Dutch Shell Group and which had been caused by the purchase by the Standard Oil Company from the Soviet Government of Russia of kerosene which the Royal Dutch Shell Group received rightfully belonged wholly or in part to them. It was represented to the Government of India that, as a result of this war, kerosene was being sold at prices well below world parity and it was from the serious losses consequent on these uneconomic prices that the Companies concerned asked for protection. The Tariff Board were directed :—

(1) to determine what price for kerosene should be taken to be equivalent to world parity at Indian ports and the extent to which current prices in India were below that level,

(2) to report whether it was in the national interest that protection against the dumping of imported kerosene should be given, and, if so, in what form and for what period, and

(3) to report whether it was likely that the price war would extend to petrol, what the consequences to the Indian producers were likely to be if it did and, in that case, what measures they would recommend.

In its report, which was submitted to the Government of India in June 1928, the majority of the Board held that the sale of kerosene in India below world parity as the result of the price war had been established. In arriving at this finding, they took the equivalent of world parity at Indian ports to mean not necessarily a fair selling price but the price of imported kerosene with reference to which the price of kerosene in India would be fixed ex-main installation in normal conditions. On this interpretation, they considered that the price should be determined by the f. o. b. American Gulf price plus freight from Gulf ports to India and incidental charges such as profit, storage, duty, etc. Taking inferior and superior kerosene in the same proportion as the Indian production, they estimated the equivalent of world parity at Indian ports at Rs. 4-8-4 per unit of 8 Imperial gallons in bulk. As the greater portion of the sales of kerosene in India was made by the Burmah Shell Oil Storage and Distributing Company of India, Limited, the Board held that the average price obtained by its ex-installaton from all areas in India, other than the economic areas of the Assam and Attock Oil Companies, nearly Rs. 3-10-9 per unit of 8 Imperial gallons in bulk, might fairly be taken as the current price of kerosene. This figure represented the price at which indigenous oil and imported oil were sold by the Burmah Shell Oil Storage and Distributing Company in the Indian market.

The reply of the majority of the Board to the second of its terms of reference was that no case had been made out for safeguarding the Indian Oil Industry against the sale of imported kerosene below world parity. Before arriving at this finding, the Board examined the present position of the production of oil in the various oil fields in India, and the financial position of the Oil Companies and also considered the various national interests affected by the Industry. As regards oil production, it found that the oils production in the main field in Burma, *viz.*, Yenangyaung, was now definitely on the decline and though in the Singu and Indaw fields in Burma, and in the Assam and Attock fields, there was the prospect of enhanced production, it was clearly a matter of considerable importance to the future oil production of India, that the Companies should be in a position to continue prospecting and development work. Its examination of the financial position of the Companies convinced it that profits had been considerably reduced and that the reduction might lead to some restoration of development work in the case of one or two companies. But it was satisfied that no premature closing of oil works would be necessary and that the present production of oil was not likely to be affected to any

considerable extent. A very considerable part of the reduction of the profits was due to the fall in prices of products other than kerosene due to overproduction in America but as American conditions improved, the effect would be reflected in prices in India. Since the prices of the various petroleum products: wax, petrol, turpentale, lubricating oil, jute batching oil and Diesel fuel, was not fixed but was variable within certain limits with little change in the cost of refining, it was probable that in this direction, the Indian Companies might to some extent obtain relief from the effects of the price war. The Board further held that although the price war might continue for some time, it appeared that the Royal Dutch Shell Group and the Indian Companies associated with it would endeavour to stabilise kerosene prices at or slightly above the then existing level. It held, therefore, that the most acute period in the price war was past. As regards the national interests affected by the Industry, its conclusion was that the price war in kerosene, whilst of immediate benefit to the consumer, would neither adversely affect Government revenues, nor seriously prejudice the future production of oil in India. On the other hand, the economic pressure resulting therefrom was likely to reduce the costs of production and lead to better utilisation and conservation of the mineral resources of the country. The absorption of one or more of the smaller Companies by the larger was not necessarily an evil since it would probably lead to a more methodical and scientific system of drilling with better recovery of petrol and better utilisation of gas as a source of power. Whilst the Board held that no case had been made out for safeguarding the Indian Oil Industry against the sale of imported kerosene below world parity, it considered that the recent reductions in railway freight on petrol and other oil products would seriously affect the Attock Oil Company's position in competing with foreign oil, since these reductions did not apply to the transport of oil within the economic area served by the Attock Oil Company. It commended the point to the careful consideration of the Government of India.

The reply of the majority of the Board to the third of its terms of reference was that it was improbable that foreign petrol would be imported into India on any considerable scale within two years. Whilst it was impossible to foresee what the market arrangements between the various Companies would be at the end of that period or to determine whether the price war would extend to petrol, the Board held that no immediate measures were called for.

The President of the Tariff Board, Sir P. P. Ginwala, submitted a separate report in which he dissented from the finding of his colleagues under all three heads though he agreed with them that no case had been established for the grant of protection in any form either as regards kerosene or petrol. He held that the average prices of imported kerosene from September, 1927, to the date of the Board's report, had not fallen below American parity and that no dumping, that is, the sale of imported kerosene below American parity had, therefore, been established. The real equivalent of world parity at Indian ports, in his view, was the price at which, under competitive conditions, kerosene was or could be imported on a commercial scale. Russian oil had been so imported and landed in India, duty paid at Rs. 3-10-7 per unit for superior and Rs. 3-7-11 for superior and inferior combined. On these figures, the indigenous industry had been realising prices very considerably above world prices. Sir P. P Ginwala further held that there was evidence that during the six months between January and July, 1927, an additional burden of more than Rs. 1¼ crores had been thrown on the consumer by the indigenous industry and the foreign importers by the selling prices being in excess of American parity. There was also evidence which suggested that all petroleum products were being sold in India at exorbitant prices owing to oil business being in the hands of Oil Trusts, and that the consumer had to pay a sum which might amount to Rs. 5 crores per annum in excess of economic prices. He considered it in the national interest that the subject should be further explored with the object of bringing about a reduction in the exorbitant prices of petroleum products. He suggested the importation of crude oil and the erection of refineries by Rupee Companies, particularly in Bombay, or the control by Government of prices as a possible line of action which might result in the lowering of prices. As regards petrol, he held that a shortage might lead to a rate war though it was difficult to predict its date or the turn it would take.

Decision of the Government of India.—In a Resolution dated September 12th, 1928, by which time the price war between the Standard Oil Company of New York and the Royal Dutch Shell Group had come to an end, the Government of India considered that the following points had been established :—

(1) The average price realised by the Standard Oil Company for all kerosene imported by it into India between Septembder, 1927, and March, 1928, was Rs. 4-15-2 per unit and this price was above world parity, whatever criterion was adopted to determine its level. The Standard Oil Company imported only superior kerosene.

(2) There was no evidence that the Standard Oil Company took the initiative anywhere in India in cutting prices or did more than follow, to an extent which varied in different localities, the cuts made by the Burmah Shell Company, which is the selling agency of the Asiatic Petroleum Company (representing the Royal Dutch Shell Group) and of the companies in India which were members of the Kerosene Pool, and also of the Anglo-Persian Oil Company.

(3) The average price realised by the Asiatic Petroleum Company for superior kerosene imported by it into India during the same period was Rs. 3-13-6 per unit. This price was lower, by more than one rupee per unit, than the average price realised by the Standard Oil Company and was below world parity, whatever criterion was adopted, unless the very low price said to have been paid by the Standard Oil Company for Russian kerosene were taken as the basis.

(4) It followed that the only Company that could be considered to have sold imported kerosene at prices below world parity was the Company which was working in closest alliance with the principal producer in India and not the Company against whichthe application for protection was originally directed.

The Government of India also commented on the mention in the majority and minority reports of the Tariff Board of the failure of the applicant companies who were members of the Kerosene Pool to disclose in their representation to them the important fact that the Royal Dutch Shell Group had recognised their claim to compensation for losses suffered as a result of the price war. It appeared that an agreement on this subject had been reached prior to the date on which the Government of India made the reference to the Tariff Board but although this important fact was material to the issue whether there was a *prima facie* case for an enquiry or not, it had not been brought to the notice of the Government of India at any time. The existence of a subsequent agreement by which the Burmah Oil Company undertook to make good to the other Indian members of the Pool, the remainder of their losses as measured by the difference between Indian and American prices had been disclosed at the end of the enquiry. In the face of these agreements, the Government of India stated that it would have been impossible for them to consider the grant of further assistance to the companies which were members of the Pool. If the price war had not ended, it would have been necessary to consider whether any steps should be taken to safeguard the two companies which were not members of the Pool, the Indo-Burma Petroleum Company and the Attock Oil Company. As the price war had ended, it was unnecessary to arrive at any conclusion on the point but the Government of India accepted the finding of the Board that no case had been made out for safeguarding any company against the sale of imported kerosene below world parity. They also accepted the finding tbat petrol was not likely to be imported into India on any considerable scale during the next two years and that no action was called for.

Match Industry.—The question of protection to the match industry was referred to the Tariff Board in October 1926, as the result of the progressive decline in the customs revenue derived from matches. The duty on matches was raised to Rs. 1-8-0 per gross in March 1922 which represents a duty of more than 100 per cent. *ad valorem*. This high duty had naturally a protective effect. Numerous match factories were established in India and, concurrently, the customs revenue on matches which amounted to Rs. 154 lakhs in 1922-23 fell to Rs. 118 lakhs in 1925-26.

The Tariff Board was directed to report whether the conditions laid down by the Fiscal Commission were satisfied by the match industry and whether the industry should be protected. If the answer to that question were in the affirmative, the Board was directed to report at what rate the import duty should be fixed in order to give the protection required and whether alternative measures of protection could suitably be adopted. If the answer were in the negative, the Board was directed to report to what extent vested interests had been created in India as the result of the existing rate of duty, how far these interests required consideration and what prospect there was of the match industry establishing itself, if the existing rate of duty were maintained. If the Board decided that vested interests required the maintenance of the duty at the existing rate, it was further to report whether the loss of customs duty could be made up in whole or in part by any other appropriate form of taxation of the industry.

In its report, which was submitted to Government in April 1928, the Board pointed out that, under the stimulus of the high revenue duty, the Match industry in India had made striking progress. At the date of its report, there were 27 factories in existence with a capacity of 500 gross a day or over and their total capacity amounted to about 18 million gross matches annually. The imports of matches had declined from 13·68 million gross in 1921-22 to 6·13 million gross in 1926-27. This rapid expansion had been accompanied by a large reduction in costs, partly due to increased output and the introduction of up-to-date machinery but mainly to the improved efficiency of Indian labour.

In determining the fair selling price of Indian matches and the price of imported matches against which they had to compete, the Board took half size matches as representative of the industry as a whole as these constituted the bulk of the Indian production as well as of the imports. It based its estimate of the fair selling price on the costs of the Swedish Match Company's factory at Ambernath as this factory is the largest unit in the Match industry in India and is engaged solely in the production of half size matches. It is also the only match factory in India, the costs of which are kept on a regular cost accounting system. On this basis, the Board estimated the present fair selling price, f. o. r. works (including dealers' commission) of half size matches manufactured in India from imported aspen for splints and Indian wood for boxes at Rs. 1-4-0.94 per gross and from Indian wood for both splints and boxes at Rs. 1-2-7.43 per gross. The future fair selling prices were estimated at Rs. 1-2-5·60 per gross and Rs. 1-2-2·21 per gross, respectively. The Board pointed out that the costs of several of the larger factories under Indian control were lower than those of the Swedish Match Company. The present fair selling price which they had estimated on the basis of the costs of the Ambernath factory was thus more than sufficient to enable Indian manufacturers to secure a normal return on their capital. The Board found that the price at which imported half size matches had been sold in Bombay, excluding duty but including landing and importation charges and dealers' commission was as low as 11 annas 10 pies per gross. The price f.o.r. works in Sweden corresponding to this price would probably not exceed 7½ *d.* which it considered an uneconomical price. In its view, a duty free price of Rs. 1-1-4¾ per gross might be regarded as a fair price for imported half size matches in India.

The Board found that the Indian Match Industry satisfied all the conditions laid down by the Fiscal Commission. It possessed two important natural advantages in the possession of a large home market and the existence of a supply of cheap labour. The Board estimated the present consumption of matches in India at 17 million gross a year and held that in this respect India had a distinct advantage over foreign manufacturers. As regards labour, it pointed out that the machinery employed in the manufacture of matches is largely of a simple and automatic character and can be operated efficiently by Indian workmen. The cheapness of Indian labour, therefore, gave the industry an advantage over Sweden. On the other hand, certain materials such as chemicals were not available in India but it had to be remembered that so far as the Match industry was concerned, no country could claim to possess all or most of the materials required. Again, where aspen was used in the manufacture of splints, the price of wood was higher in India than Sweden but this disadvantage was counterbalanced by the freight and the costs incidentalto the importation of matches. As regards supplies of wood in India, the Board found that there was an assured supply of Indian timber in Burma, Bengal, Assam, the United Provinces and the Punjab, sufficient for the manufacture of half the total demand in India. It suggested that local governments within whose territories match factories of any size or importance had been established should adopt a cautious programme of plantation with reference to the probable future requirements of the factories and that a definite research project into the Match industry should be drawn up at the Forest Research Institute, Dehra Dun.

As regards the condition laid down by the Fiscal Commission, that an industry granted protection must be one which without the help of protection is either not likely to develop at all or is not likely to develop so rapidly as is desirable in the interests of the country, the Board found that, even on the present fair selling price as estimated by it, Indian matches should, other things being equal, be able to compete against imported matches with the ordinary revenue duty of 15 per cent. The need for protection arose from the fact that imported matches were sold at uneconomical prices and that there existed a marked prejudice against Indian matches, which, in the case of the best Indian factories, was not justified by any differences of quality.

As for the third condition laid down by the Fiscal Commission that the industry must be one which will eventually be able to face world competition without protection, the Board reported that its estimate of future economies had been based on conservative lines and that it had no doubt that the Match industry would eventually be able to dispense with protection if there were no unfair competition and if the prejudice against Indian matches gradually disappeared.

As regards the measure of protection required, the Board reported that, *prima facie*, this might be estimated at 9 annas per gross, this being approximately the difference between the present fair selling price of Indian half size matches consisting of aspen splints and Indian wood boxes and the duty free landed price of imported half size matches. To this, however, should be added a margin sufficient to secure for Indian matches in the retail market an advantage sufficient to cover the prejudice against them. In view of the limitations imposed by the minimum monetary unit in use in the match trade (the pice) which rendered it essential that there should be a difference in the retail market of at least one pice per unit of sale if the Indian match were to retain any advantage over the imported match, and having regard to the possibility of variations in the middleman's profit, the Board recommended that the present revenue duty of Rs. 1-8-0 per gross should be maintained and converted into a protective duty. In view of the fact that the prices of Indian matches are now determined by internal competition and that a fairly long period must be allowed for working out any scheme of plantation, no limit to the period of protection was suggested.

The Board did not consider that the manufacture of matches was a fit industry for development on cottage lines, especially in view of the dangerous character of some of the materials employed in it but suggested that, if an excise duty were imposed on matches manufactured in India, a reduction not exceeding 2 annas per gross should be made in the case of cottage factories in consideration of their limited resources.

The Board found that there was no ground for the complaint that the Swedish Match Company had engaged in unfair competition with factories under Indian control by systematically selling the products of their Indian factories at uneconomical prices. On the other hand, these were generally sold at higher prices than matches made by Indian manufacturers. Uneconomical prices had, however, been charged for imported half size matches. The Board did not find that the interests of the Indian industry had been jeopardized by the activity of the Company or that the existence of its factories in India had been prejudicial to the national interest. On the contrary, it held strongly that the elimination of the Swedish Match Company from India would be to the advantage neither of the industry nor of the country as a whole. It did not think that, in present circumstances, any action was called for against the Swedish Match Company on the ground of unfair competition but in view of the vast resources of the Company and the policy pursued by them in other countries, considered it advisable that future developments of the Company in India should be watched. Should such developments indicate that the Company was acquiring undue control to the detriment of the Indian industry, it recommended that Government should take steps to safeguard the latter. It considered that, if the industry were declared protected, the Swedish Match Company should take steps at the earliest possible opportunity, to organise its business in India on the basis of an Indian Company under the control of a local directorate with suitable Indian representation on it.

Finally, the Board pointed out that, if the scheme of protection were successful, the Government revenue from matches which, in 1923-24 stood at Rs. 138 lakhs was likely to fall to about Rs. 17 lakhs. In these circumstances, an excise duty might, if necessary, be imposed on match factories in India. It refrained from recommending any definite rate of duty as this must depend on the Government's financial requirements but suggested that, if an excise duty were levied, it should be accompanied by a corresponding increase in the import duty so as not to trench on the degree of protection afforded to the industry. In levying the duty, care should be taken to fix it at such a level as to absorb as far as possible the whole of the increase in price.

Decision of the Government of India.—In a Resolution dated September 1st, 1928, the Government of India accepted all the findings of the Tariff Board. In doing so, they stated that, if it became evident that the Swedish Match Company had definitely adopted a policy of supplying the Indian market by matches made in India, and if it appeared that the prejudice against the Indian match, similar in quality to the imported match was disappearing, the amount of the duty would require reconsideration. They added that, if it appeared probable that the Swedish Match Company would obtain a monopoly of the manufacture and sale of matches in India, this would create a new situation which would necessitate an examination of the position. They also stated that they did not contemplate the imposition of an excise duty on matches at present.

Legislation converting the revenue duty of Rs. 1-8-0 per gross on matches in boxes containing on an average not more than 100 matches and of six annas for every 25 matches or fraction thereof in boxes containing on the average more than 100 matches into a protective duty and imposing a protective duty of 4 annas 6 pies per pound on undipped splints and of six annas per pound on veneers ordinarily used for making boxes was passed at the September Session of the Imperial Legislature as Act XVII of 1928.

COPYRIGHT.

There is no provision of law in British India for the registration of Copyright. Protection for Copyright accrues under the Indian Copyright Act under which there is now no registration of rights, but the printer has to supply copies of these works as stated in that Act and in the Printing Presses and Books Act XXV of 1867. The Indian Copyright Act made such modifications in the Imperial Copyright Act of 1911 as appeared to be desirable for adapting its provisions to the circumstances of India. The Imperial Act of 1911 was brought into force in India by proclamation in the *Gazette of India* on October 30, 1912. Under s. 27 of that Act there is limited power for the legislature of British possessions to modify or add to the provisions of the Act in its application to the possession, and it is under this power that the Indian Act of 1914 was passed. The portions of the Imperial Act applicable to British are scheduled to the Indian Act. The Act to which these provisions are scheduled makes some formal adaptations of them to Indian law and procedure, and some material modifications of them in their applications, translations and musical compositions. In the case of works first published in British India the sole right to produce, reproduce, perform or publish a translation is, subject to an important proviso, to subsist only for ten years from the first publication of the work. The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, "have not been published, *i.e.*, written in staff notation, except through the medium of the phonograph. It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, printed, reduced to writing, or otherwise graphically produced or reproduced."

Customs Tariff.

General import duties are levied for fiscal purposes and not for the protection of Indian industries. But the tariff has been modified with a view to admitting free or at favourable rates articles, the cheap import of which was considered necessary in the interests of the country. Thus certain raw materials, manures, agricultural implements and dairy appliances are admitted free. Machinery, printing materials, etc. are assessed at 2½ per cent. and iron and steel railway material and ships at 10 per cent. High duties are imposed on tobacco, liquors and matches.

Re-Imports.—Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re-import exempted from duty on the following conditions:—

The Collector of Customs must be satisfied—

(1) of the identity of the articles;

(2) that no drawback of duty was paid on their export;

(3) that the ownership has not changed between the time of re-export and subsequent re-import;

(4) that they are private personal property re-imported for personal use, not merchandise for sale;

(5) that not more than three years have passed since they were re-exported.

Duty is, however, charged on the cost of repairs done to the articles while abroad which should be declared by the person re-importing the articles in a form which will be supplied to him at the time of re-importation.

To facilitate identification on re-importation an export certificate giving the necessary particulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examination.

This concession of free entry on re-importation is not extended for the benefit of Companies or Corporate Bodies.

Drawbacks.—When any goods, capable of being easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re-exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eights of such duties shall, except as otherwise hereinafter provided, be repaid as drawback:

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re-export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended term as the Chief Customs Authority, or Chief Customs Officer on sufficient cause being shown, in any case determines, provided further that the Chief Customs Officer shall not extend the term to a period exceeding 3 years.

When any goods, having been charged with Import duty at one Customs port and thence exported to another, are re-exported by sea as aforesaid, drawback shall be allowed on such goods as if they had been so re-exported from the former port:

Provided that, in every such case, the goods be identified to the satisfaction of the Officer-in-Charge of the Custom House at the port of final exportation, and that such final exportation be made within three years from the date on which they were first imported into British India.

No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re-export.

No such payment of drawback shall be made until the vessel carrying the goods has put out to sea, or unless payment be demanded within six months from the date of entry for shipment.

Every person, or his duly authorised agent, claiming drawback on any goods duly exported, shall make and subscribe a declaration that such goods have been actually exported, and have not been re-landed and are not intended to be re-landed at any Customs port; and that such person was at the time of entry outwards and shipment, and continues to be, entitled to drawback thereon.

Merchandise Marks.—Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relating to merchandise marks. In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1889, and connected Acts and the notifications issued thereunder. The following summary of the regulations in force does not claim to be exhaustive. For those seeking more complete information a reference is suggested to the Merchandise Marks Manual which is published under the authority of the Government of India and obtainable of all agents for the sale of Indian Government publications.

Infringements or offences may be classified conveniently under four heads:—

1. Counterfeit trade marks;
2. Trade descriptions that are false in respect of the country of origin;
3. Trade descriptions that are false in other respects; and
4. Lengths not properly stamped on piece goods.

Schedule II—(Import Tariff).

NOTE 1.—In the expression "*ad valorem*" used in these Schedules the reference is to "real value" as defined in Section 30 of the Sea Customs Act, 1878 (VIII of 1878), unless an article has a tariff value assigned to it.

NOTE 2.—Tariff valued heads are based on the ordinary trade description of each article and cover all reduced grades and mixtures unless they are separately provided for.

Customs Tariff.

General import duties are levied for fiscal purposes and not for the protection of Indian industries. But the tariff has been modified with a view to admitting free or at favourable rates articles, the cheap import of which was considered necessary in the interests of the country. Thus certain raw materials, manures, agricultural implements and dairy appliances are admitted free. Machinery, printing materials, etc. are assessed at 2½ per cent. and iron and steel railway material and ships at 10 per cent. High duties are imposed on tobacco, liquors and matches.

Re-Imports.—Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re-import exempted from duty on the following conditions:—

The Collector of Customs must be satisfied—

(1) of the identity of the articles;

(2) that no drawback of duty was paid on their export;

(3) that the ownership has not changed between the time of re-export and subsequent re-import;

(4) that they are private personal property re-imported for personal use, not merchandise for sale;

(5) that not more than three years have passed since they were re-exported.

Duty is, however, charged on the cost of repairs done to the articles while abroad which should be declared by the person re-importing the articles in a form which will be supplied to him at the time of re-importation.

To facilitate identification on re-importation an export certificate giving the necessary particulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examination.

This concession of free entry on re-importation is not extended for the benefit of Companies or Corporate Bodies.

Drawbacks.—When any goods, capable of being easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re-exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eighths of such duties shall, except as otherwise hereinafter provided, be repaid as drawback:

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re-export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended term as the Chief Customs Authority, or Chief Customs Officer on sufficient cause being shown, in any case determines, provided further that the Chief Customs Officer shall not extend the term to a period exceeding 3 years.

When any goods, having been charged with Import duty at one Customs port and thence exported to another, are re-exported by sea as aforesaid, drawback shall be allowed on such goods as if they had been so re-exported from the former port:

Provided that, in every such case, the goods be identified to the satisfaction of the Officer-in-Charge of the Custom House at the port of final exportation, and that such final exportation be made within three years from the date on which they were first imported into British India.

No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re-export.

No such payment of drawback shall be made until the vessel carrying the goods has put out to sea, or unless payment be demanded within six months from the date of entry for shipment.

Every person, or his duly authorised agent, claiming drawback on any goods duly exported, shall make and subscribe a declaration that such goods have been actually exported, and have not been re-landed and are not intended to be re-landed at any Customs port; and that such person was at the time of entry outwards and shipment, and continues to be, entitled to drawback thereon.

Merchandise Marks.—Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relating to merchandise marks. In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1889, and connected Acts and the notifications issued thereunder. The following summary of the regulations in force does not claim to be exhaustive. For those seeking more complete information a reference is suggested to the Merchandise Marks Manual which is published under the authority of the Government of India and obtainable of all agents for the sale of Indian Government publications.

Infringements or offences may be classified conveniently under four heads:—

1. Counterfeit trade marks;
2. Trade descriptions that are false in respect of the country of origin;
3. Trade descriptions that are false in other respects; and
4. Lengths not properly stamped on piece goods.

Schedule II—(Import Tariff).

1.—In the expression "*ad valorem*" used in these Schedules the reference is to "real value" as defined in Section 30 of the Sea Customs Act, 1878 (VIII of 1878), unless an article has a tariff value assigned to it.

2.—Tariff valued heads are based on the ordinary trade description of each article and cover all reduced grades and mixtures unless they are separately provided for.

* Under Government of India Notification No. 1428, dated 17th November 1923, Jute Rags such as are used for paper-making, are exempt from payment of export duty provided that the Customs Collector is satisfied that they are useless for any purpose to which cloth or rope is ordinarily put.

† Under Government of India, Finance Department (Central Revenues), Notification No. 35, dated the 25th September 1926, hide and skin cuttings and fleshings, such as are used for glue-making, are exempt from payment of export duty.

Trade.

India is pre-eminently an agricultural country, and that fact dominates the course of its trade. The great export staples are the produce of the soil—wheat, seeds, cotton and jute. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such year as 1896-97 and 1899-1900. Well over thirty per cent. of the culturable area of the Punjab is under irrigation, and huge new works are in progress to utilise the waters of the Sutlej, and of the Indus in Sind. Whilst these great works have been carried out or are in progress to spill on the land the floods of the snowfed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South like the Cauvery are being harnessed to preserve their flood waters for Madras. All over India irrigation works, large and small, are being restlessly pressed forward, and their effect is to give a far greater stability to Indian agriculture.

The destination of these surplus crops is another factor of importance. The great customer for Indian cotton is Japan, and to a lesser extent the Continent of Europe. Continental Europe is also a large buyer of her oilseeds and another produce, and of her hides and skins. Whilst the United Kingdom is the great market for tea and wheat, foreign countries are a very important facts in the Indian export trade; therefore India had a vital interest in the economic recovery of Europe. When the post-war boom collapsed it hit India hard and for a year or two the export trade reeled under the shock. The progress of the Dawes Plan and the measures taken under the League of Nations to assist Austria and Hungary back to industrial health had a special bearing on the prosperity of India; they have been elements of importance in inducing her recovery of prosperity.

But whilst India is pre-eminently an agricultural country, she ranks at the International Labour Office at Geneva as one of the great industrial countries of the world. Her manufacturing industries are few in number and are concentrated in a few areas, but they are of great importance. The largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the works of the Tata Iron and Steel Company where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has lost a considerable part of its export trade to Japan, the Far East and East Africa; the mills find their principal outlet in India itself, and even there they are subject to severe competition from Japan and China. The iron and steel industry is for the most part a home industry, through large quantities of Indian pig iron are shipped to the Far East, and in some years to the western ports of North and South America. Therefore, whilst India is still in the main an agricultural country, three-quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing importance, and their prosperity every year affects in an increasing degree the general prosperity of the people.

I.—GENERAL.

India's foreign trade, both exports and imports, showed considerable improvement during 1927-28. The total value of the exports of merchandise advanced by Rs. 20 crores or 6 per cent. to Rs. 3,29 crores, while imports rose by Rs. 19 crores or 8 per cent. to Rs. 2,50 crores. The monsoon of the year was unusually good, except for floods in certain areas and the output of crops was, therefore, generally satisfactory. Exchange was stable and there was a steady demand during the year for the staple articles of Indian produce with the exception of cotton.

The Volume of trade.—The following figures show the values of imports and exports of merchandise on the basis of the declared value

in 1913-14. These statistics are necessarily approximate, but they are sufficiently accurate to afford a fairly reliable measure of the course of trade :—

(In crores of Rupees.)

——	1913–14	1920–21	1921–22	1922–23	1923–24	1924–25	1925–26	1926–27	1927–28
Imports	183	142	124	138	120	137	143	156	181
Exports	244	172	182	214	240	250	246	228	248
TOTAL TRADE IN MERCHANDISE EXCLUDING RE-EXPORTS.	427	314	306	352	360	387	389	384	429

It will be noticed that imports in 1927-28 reached very nearly the pre-war level, thanks to lower prices and the successive good monsoons which have increased the purchasing power of the country. Exports also were actually above the 1913-14 level, though a little below the record of 1924-25.

Conditions in Foreign Countries.—The features of progress above detailed would not naturally have been obtained, if economic conditions in most of the countries with which India has trade dealings had not been stable. The year 1927, saw Great Britain recovering from the depressing effects of her long coal strike. On the Continent, the year witnessed the return of Italy to the gold standard and the virtual stabilisation of the French exchange. The United States of America had another year of prosperity. Conditions in the Far East, however, were unsatisfactory. The failure of an important firm in Japan was followed by a severe financial crisis from which that country has not yet fully recovered. Conditions in China also continued unsettled. Both these countries, therefore, purchased less of Indian goods during the year, but their exports to India showed increases.

Imports and Exports—Imports of cotton piece-goods rose by 185 million yards or 10 per cent. in quantity to 1,973 million yards, while the corresponding gain in value was only of Rs. 12 lakhs, not even 1 per cent. of the total value of Rs. 55 crores. Grey goods advanced from 748 million yards valued at Rs. 19⅗ crores to 875 million yards valued at Rs 21¼ crores, but the increase was offset by a decrease under white goods which fell from 571 million yards valued at Rs. 17½ crores to 556 million yards valued at Rs. 15½ crores. The value of coloured goods remained fairly steady at Rs. 17½ crores, though the quantity imported rose from 447 million yards to 505 million yards. Imports of cotton twist and yarn also increased from 49 million lbs. to 52 million lbs. but the value recorded, *viz.*, Rs. 6¾ crores showed very little improvement as compared with the preceding year. The quantity of sugar imported fell by 11 per cent. from 923,000 tons to 823,000 tons, owing to reduced imports of Continental beet sugar, while, as a result of lower prices, the value fell by 21 per cent. from Rs. 19 crores to Rs. 15 crores. Imports of iron and steel rose by 41 per cent. in quantity from 846,000 tons to 1,197,000 tons and by 28 per cent. in value from Rs. 16¾ crores to nearly Rs. 21½ crores. Machinery and millwork advanced by Rs. 2 crores to Rs. 16 crores, railway plant and rolling stock by Rs. 1½ crores to Rs. 4¾ crores and motor vehicles by Rs. 1 crore to Rs. 5 crores. Imports of hardware were valued at Rs. 5¼ crores as against Rs. 5 crores in the preceding year. Larger arrivals of kerosene oil from Russia and Georgia and of fuel oils from Persia were responsible for an increase of 49 million gallons in the quantity and Rs. 1½ crores in the value of the imports of mineral oils, which amounted to 232 million gallons costing nearly Rs. 10½ crores. Imports of provisions were valued at Rs. 6½ crores as compared with Rs. 5¾ crores in 1926-27. The value of silk and silk manufactures and also of wool and woollens totalled over Rs. 5 and Rs. 5⅓ crores respectively as against Rs. 4½ crores each in the preceding year. Imports of artificial silk (including yarn and manufactures) were valued at Rs. 5½ crores, showing an increase of Rs. 1¼ crores as compared with the preceding year. Imports of cotton, mostly of American and East African origin, continued on a large scale and amounted to 66,000 tons valued at Rs. 6¾ crores as compared with 46,000 tons valued at Rs. 5 crores in 1926-27. The value of the imports of liquors (notwithstanding an increase in quantity) and of paper remained fairly stationary at Rs. 3¼ crores and Rs. 3 crores respectively.

Exports.—On the export side, the total value of raw and manufactured jute exported increased from Rs. 80 crores to Rs. 84 crores. Raw jute rose by 184,000 tons or 26 per cent. in quantity to the record figure of 892,000 tons, while the value improved by Rs. 4 crores or 15 per cent. to Rs. 30⅗ crores. Shipments of gunny bags also increased in number from 449 to 463 millions, but the value realised fell from Rs. 24⅓ crores to Rs. 23½ crores. The value of gunny cloth exported advanced from Rs. 28½ crores to Rs. 30 crores, the quantity rising from 1,503 million yards to 1,553 million yards. Exports of raw and manufactured cotton decreased by Rs. 13 crores or 19 per cent. to Rs. 57 crores, raw cotton accounting for a decrease of Rs. 11 crores. Shipments of rice increased by 6 per cent. in quantity and 2 per cent. in value and amounted to 2,152,000 tons valued at Rs. 33⅗ crores. Exports of wheat rose from 176,000 tons valued

at Rs. 2¾ crores to 300,000 tons valued at Rs. 4½ crores. Food grains, other than these and pulses also showed increases. The tea trade showed a large improvement, shipments increasing in quantity by nearly 12½ million lbs. and in value by Rs. 3½ crores to 362 million lbs. valued at Rs. 32½ crores. The total value of the shipments of oilseeds advanced by Rs. 7½ crores to Rs.26½ crores, the exports of groundnuts being almost double the quantity despatched in the preceding year. The quantity of lac exported decreased by 8 per cent. from 592,000 cwts to 544,000 cwts. but higher prices accounted for an increased return of Rs. 1½ crores or 28 per cent., the total value realised being Rs. 7 crores.

Balance of Trade.—The visible balance of trade in merchandise and treasure for the year 1927-28 was in favour of India to the extent of Rs. 50 crores as compared with Rs. 40 crores in the preceding year and the record figure of Rs. 1,09 crores in 1925-26. The net imports of private treasure further declined from Rs. 39 crores to Rs. 32 crores, of which net imports of gold were valued at Rs. 18,10 lakhs and silver at Rs. 13,85 lakhs. Net imports of currency notes amounted to Rs. 24 lakhs.

II—IMPORTS OF MERCHANDISE.

The following table shows the comparative importance of the principal articles imported into British India :—

IMPORTS.

(In thousands of Rupees.)

—	1923-24.	1924-25.	1925-26.	1926-27.	1927-28.	Percentage of proportion to total imports of merchandise in 1927-28.

ufactures (Rs. 65,16 Lakhs). ...lue of the imports of cotton ... 1927-28, showed little variation from the preceding year's figure. In quantities however, there were substantial increases, chiefly on the piece-goods side.

The values of the different classes of imported cotton manufactures during the past five years and the pre-war year 1913-14 are set forth below :—

Imports of cotton manufactures.	1913-14 (pre-war year.)	1923-24.	1924-25.	1925-26.	1926-27.	1927-28.

Cotton Twist and Yarn (Rs. 679 Lakhs)—The imports of twist and yarn amounted to 52·3 million lbs. as against 49·4 million lbs. in 1926-27. There was thus an increase of nearly 3 million lbs. in quantity over 1926-27, the corresponding value increase being Rs. 17 lakhs. The average declared value per lb. of yarn imported during the year was Re. 1-4-9 as against Re. 1-5-6 in 1926-27 and Re. 1-8-0 in 1925-26. Of the total imports, 20½ million lbs. were derived from the United Kingdom, nearly 17 million lbs. from Japan and over 12 million lbs. from China. Imports from these countries in the preceding year were 20 million lbs., 26½ million lbs. and 930,000 lbs. respectively. It will be seen that while the United Kingdom succeeded in maintaining her previous year's record, there was a considerable falling-off in the imports from Japan. The Japanese cotton industry has been passing through a period of depression since the financial crisis that occurred in that country in the spring of 1927. The output of the companies, forming the Japanese Cotton Spinners' Association, was curtailed from May 1927, by restricting the number of spindles to be worked, the percentage of idle spindles, during the first six months, being 15 and, from the middle of November 1927, approximately 20. Imports from China, on the other hand, showed a remarkable advance. Costs of production in China are reported to be lower than in Japan ; and further, the Japanese-controlled mills in China, unable to dispose of their goods in the Chinese markets owing to the disturbed political conditions in that country, sent large consignments to the Indian market. Other sources of imports of yarn to India were the Netherlands (588,000 lbs.), Switzerland (484,000 lbs.) and Italy (425,000 lbs.). In the preceding year supplies from these countries amounted to 486,000, 691,000 and 314,000 lbs. respectively.

Cotton Yarn.—From 22nd September 1927, the import duty on cotton yarn was modified from 5 per cent. to 5 per cent. or 1½ annas per lb., whichever is higher. The incidence of the duty thus falls more heavily on the lower than on the higher grade yarns.

The production of yarn in Indian mills exceeded even the record attained in 1926-27 and amounted to nearly 809 million lbs.

The United Kingdom's share in the total trade in cotton twist and yarn fell from 41 per cent. in 1926-27 to 39 per cent. Japan's share fell from 54 per cent. to 32 per cent. while China's share advanced from 2 per cent. to 25 per cent.

Cotton piece goods The imports of cotton piecegoods, including fents, exceeded the preceding year's receipts by 185 million yards, though, in value, the increase registered was only R12 lakhs. Compared with the pre-war year 1913-14 the imports in 1927-28 were less by over 1,200 million yards, but the year's record was the highest since 1916-17. The figures for the three important classes of cotton piecegoods from 1913-14 onwards is set forth in the table below:

—	Grey (unbleached).	White (bleached)	Coloured, printed or dyed.
Year.	Million yards.	Million yards.	Million yards.
1913-14 ..	1,534·2	793·3	831·8

The United Kingdom's share in the imports of grey goods increased from 589 million yards to 651 million yards, an advance by 62 million yards or 11 per cent. The Japanese share increased by about the same amount from 155 million yards to 215 million yards. The imports from China (including Hongkong) advanced from 1·8 million yards to 7 million yards, but the share of the United States of America receded from 2.7 million yards to 2·2 million yards. White goods, as usual, were derived principally from the United Kingdom, which sent 527 million yards as against 550 million yards in the preceding year. Switzerland's share increased by 3½ million yards to 12 million yards and that of Japan from 2.9 million yards to 5·6 million yards. The Netherlands sent 7½ million yards. The British share in the import of white piecegoods was 95 per cent. as against 96 per cent. in 1926-27 and 1925-26.

In the imports of coloured, printed or dyed piecegoods the United Kingdom's share increased by 34 million yards to 352 million yards. Italy has been pushing her trade in this line, her contribution during the year amounting to 24½ million yards as against 15½ million yards in 1926-27 and 9·8 million yards in 1925-26. The Japanese share which is more considerable has also been advancing continuously, 102·7 million yards having been sent from that country in 1927-28 as against 85·8 million yards in 1926-27 and 69½ million yards in 1925-26.

Percentage share of the United Kingdom and Japan in the imports of cotton piecegoods.

Coloured ..	92.6	.2	83.1	10.0	73.1	19.0	71.1	19.2	69.8	20.3

Wool, raw and Manufactured (Rs. 5,37 lakhs).—Imports of raw wool advanced from nearly 5 million lbs. valued at Rs. 32 lakhs in 1926-27 to 5·8 million lbs. valued at Rs, 45 lakhs in 1927-28.

There has been a steady advance in the imports of woollen piecegoods in recent years. Imports in 1927-28 amounted to 18·8 million yards as against 15½ million yards in the preceding year and were valued at Rs. 3,28½ lakhs, an increase of 22 per cent. in quantity and 18 per cent. in value over 1926-27.

Artificial silk (Rs. 5,49 lakhs)—The figures in the marginal table are evidence of the increasing absorption of artificial silk yarn, the imports in 1926-27 being 116 per cent. over that of the previous year, while the increase in 1927-28 over the preceding year was 30 per cent. The lead in this line established by Italy since 1925-26 was maintained in 1927, but the United Kingdom was a colse competitor. Very nearly the whole of the increase in the imports during the year was contributed by that country, the British product commending itself by its quality for use in mills for the production of cotton and artificial silk mixtures. The quantities imported from Italy and the United Kingdom during 1927-28 were 3,432,000 lbs. and 2,277,000 lbs. as compared with 3,843,000 lbs. and 655,000 lbs. in the preceding year. It will be seen that the imports from Italy during 1927-28 were a little less than in 1926-27, while the British trade registered an advance of 248 per cent.

Imports of Artificial silk yarn.

	lbs. (000)	Rs. (000)
1922-23	225	13,40
1923-24	406	19,55
1924-25	1,171	42,40
1925-26	2,671	74,72
1926-27	5,776	1,02,64
1927-28	7,510	14,921

Silk, raw and Manufactured (Rs. 5,06 lakhs).—India's absorption of raw silk has been increasing in recent years. Imports in 1925-26 were 1,325,000 lbs., in 1926-27 1,783,000 lbs. and in the year under review 2,356,000 lbs. The bulk of the imports came, as usual, from China (including Hongkong), 2,270,000 lbs. being derived from that source.

Metals and Manufactures thereof (Rs. 28,40 lakhs).—The imports of metals and manufactures thereof increased by 38 per cent. in quantity from 910,000 tons to 1,259,000 tons and by 19 per cent. in value from nearly Rs. 24 crores to over Rs. 28½ crores. Iron and steel represented Rs. 21½ crores of this total and rose to the second place in order of importance among imports, displacing sugar which occupied that position in the preceding year. If such items as machinery and mill-work, railway plant and rolling stock, cutlery, hardware, implements and instruments, and motor vehicles are included in one head with metals and manufactures thereof the aggregate value would amount to Rs. 65½

Number of motor vehicles registered in British India up to 31st March 1928

(*a*) Represent number of Vehicles re-registered during the year ending 31st March 1928.

(*b*) Figures relate to the year ended 31st December 1927.

crores; this figure may be compared with the value of yarn and textile fabrics, the most important group among imports, *viz.*, Rs. 81 crores. The corresponding figures for the preceding year were, for the metals group, Rs. 56 crores and, for textiles, Rs. 79 crores.

Iron and steel (Rs. 21,14 lakhs).—The United Kingdom is the largest supplier of iron and steel materials to India and the imports from that country, which in the preceding year had been affected by the British coal strike of 1926, recovered during 1927 and reached a record figure. The output of pig-iron in the United Kingdom rose from 2½ million tons in 1926 to over 7 million tons in 1927, while the production of steel ingots and castings rose from 3½ million tons to over 9 million tons. British steel-makers also made very great efforts during the year to reduce prices to meet foreign competition.

Other metals (Rs. 6,96 lakhs).—Imports of metals' other than iron and steel fell from 64,000 tons to 62,000 tons in quantity and from Rs. 7,06 lakhs to Rs. 6,96 lakhs in value. The imports of aluminium increased from 97,000 cwts, valued at Rs.95 lakhs in 1926-27 to 135,000 cwts. valued at Rs. 1,18½ lakhs in 1927-28.This represented a rise of 39 per cent. in quantity and of 25 per cent. in value.

Imports of brass decreased from 529,000 cwts. valued at Rs. 2,56½ lakhs to 508,000 cwts. valued at Rs. 2,33¾ lakhs. Mixed or yellow metal for sheathing,which formed 84 per cent. of the total quantity imported in 1927-28, increased slightly in quantity from 427,000 cwts. to 428,000 cwts. but declined in value from Rs. 2, 05 lakhs to Rs. 1,94½ lakhs. Imports from the United Kingdom increased from 121,000 cwts. valued at Rs. 60¼ lakhs to 168,000 cwts. valued at Rs. 75 lakhs. But, as in the preceding year, Germany retained her place as the chief supplier.

Imports of copper declined from 317,000 cwts. valued at Rs. 1,53 lakhs to 261,000 cwts. valued at Rs. 1,29 lakhs, Both unwrought and wrought copper (the latter consisting mostly of sheets) decreased,the former from Rs.24¾ lakhs to nearly Rs. 17 lakhs and the latter from Rs. 1,27 lakhs to Rs. 110 lakhs.

Machinery & Millwork (Rs. 16,99 lakhs)—In 1926-27 machinery and millwork had fallen to the fourth place in order of importance in India's import trade. In 1927-28 there was as considerable increase in imports and this head

ranked third in importance, coming next to cotton manufactures and iron and steel. The total imports of machinery of all kinds including belting for machinery and printing presses, during 1927-28 were valued at Rs. 16,99 lakhs, as compared with Rs. 14,60 lakhs in 1926-27 and Rs. 15,87 lakhs in 1925-26. An important contributing factor to the increase in the import trade was the removal or reduction of the custom duties on certain kinds of machinery from 1st October 1927, effected in pursuance of the recommendations of the Indian Tariff (Cotton Textile Board).

The value of all kinds of textile machinery imported increased by 23 per cent from Rs. 2,51½ lakhs to R3,08⅝ lakhs, of which the United Kingdom's supplies accounted for Rs. 2,89 lakhs or 94 per cent. In the preceding year she was responsible for 95 per cent of the imports) with a total value of Rs. 2,40 lakhs. Imports of cotton machinery were steadily on the decline for some years, but the tendency was arrested in 1927-28 imports amounting to Rs. 1,97 lakhs as compared with Rs. 1,70½ lakhs in 1926-27. Spinning and weaving machinery showed increases of Rs. 21 and Rs. 12 lakhs, respectively Jute manufacturing machinery advanced from Rs. 64⅜ lakhs to Rs. 94 lakhs, while wool manufacturing machinery fell from Rs. 4 go Rs. 1⅝ lakhs. Imports of electrical machinery declined from Rs. 2,29¾ lakhs to Rs. 2,00 lakhs, decrease being noticiable in the case of transformers and generating plant.

Railway plant and rolling stock (Rs. 9,35 lakhs).—The total imports on private and Government account registered under this head (which,it may be remarked, excludes rails, chairs fishplates, etc., for railways) rose from Rs. 6, 08 lakhs to Rs. 9,35 lakhs,of which Rs.4,77 lakhs represented importations on private account and Rs. 4,58 lakhs on Government account as against R3,25 lakhs and R2,83 lakhs, respectively under corresponding heads in the preceding year.

Motor vehicles(Rs.6,18 lakhs).—There was a general lowering of the prices of motor vehicles during the year. This was due mainly to the reduction of the duty on motor cars and motor cycles from 30 to 20 per cent *ad valorem* and on pneumatic rubber tyres and tubes from 30 to15 per cent from 1st March 1927, and also to the keen competition in the automobile trade. The effect is plainly traceable in the import statistics. Leaving out of account 1920-21, when boom eondtions and lower duties prevailed, the year proved to be a record one for the imports of motor cars. The number of cars imported rose by 15 per cent from 13, 197 in 1926-27 to 15,122 in 1927-28, and their value by 20 per cent from Rs. 2,94 lakhs to Rs. 3,54 lakhs.

Sugar (Rs. 14,91 lakhs).—Increase in world production and fall in prices were the principal features of the sugar market. The world production of sugar in the season 1927-28 has been estimated at 25,118,000 tons, showing an increase of 1,371,000 tons over the preceding year, in spite of the reduction of the Cuban crop to 4 million tons. The actual production of the 1927-28 crop in Java has been estimated at 2,359,000 tons as compared with 1,960,000 tons in 1926-27. The total production of beet sugar in Europe in the season 1927-28 has been estimated at about 8 million tons as compared with nearly 7 million tons in the preceding year.

India draws the bulk of her supplies of sugar from Java. At the beginning of the year stocks of sugar in India were ample to meet demands and with prospects of a surplus crop, importers were content to postpone purchases till a lower level of prices was reached. Their attitude was also influenced by the fact that both Japan and China were ruled out as large buyers in consequence of financial troubles in the former country and civil turmoil in the latter At the same time, prospects of the beet crop in Europe were also bright and India remained the only big market available for Java. Consequently Indian importers were able to exert pressure on Java and bring down rates. During the first two months prices at Calcutta fluctuated between Rs. 11-0-0 and Rs. 11-8-0 per maund. In June prices fell below R11 and, with small fluctuations, dropped further to Rs. 10-2-0 per maund by the 22nd of July. In August and September the market was firmer,but in October prices again slummed,Rs.10-1-6 being reached on the 28th of the month. After a temporary spurt in November, prices again took a downward course in December and fell to R9-11-0per maund towards the close of January. This level was more or less maintained till nearly the close of March when a slight appreciation took place in consequence of a revival of Chinese demand for Java sugar.

In the Bombay market the quotation for Java, white, granulated, T.M.O. quality, stoop at Rs. 16-2-0 per cwt. (Rs. 11-13-7 per maund on the 1st April. There were temporary ups and downs during the rest of the month, but May saw a definitely lower tendency which carried prices to R14-8-0 per cwt. (R10-10-6 per maund) on the 8th July. August and September saw a slightly firmer market but rates sagged again in October, and continuedto show, on the whole, a downward tendency in succeding months,Rs. 14 per cwt. (Rs. 10-4-7 per maund) being recorded on the 23rd of February. The close of the year saw a firmer tendency, the quotation on the 30th March being Rs. 15-2-0 per cwt. (Rs.11-2-0 per maund).

Sugar—Imports of sugar of all sorts excluding molasses, in 1927-28 declined from 826,900 tons valued at Rs. 18,36 lakhs to 725,800 tons valued at Rs. 14,50 lakhs. The decline was at the expense of beet sugar, while cane sugar actually recorded an increase as a result of low price.

Mineral Oils (Rs. 10,44 lakhs).—The total foreign imports of all kinds of mineral oils amounted to 232 million gallons valued at over Rs. 10,44 lakhs as compared with 184 million gallons valued at Rs. 8,89 lakhs in the preceding year. About 41 per cent. of the total imports consisted of kerosene oil, 46 per cent. of fuel oil and 11 per cent. of lubricating oils.

The table shows the sources of the imports of kerosene during the past three years and the pre-war year 1913-14. Imports from the United States of America, from which nearly half of the supplies were received as against 87 per cent. in the preceding year, amounted to over 47 million gallons valued at over Rs. 3,09 lakhs. Imports from Russia, including Georgia, amounted to over 19½ million gallons valued at Rs. 1,03 lakhs.

crores; this figure may be compared with the value of yarn and textile fabrics, the most important group among imports, *viz.*, Rs. 81 crores. The corresponding figures for the preceding year were, for the metals group, Rs. 56 crores and, for textiles, Rs. 79 crores.

Iron and steel (Rs. 21,14 lakhs).—The United Kingdom is the largest supplier of iron and steel materials to India and the imports from that country, which in the preceding year had been affected by the British coal strike of 1926, recovered during 1927 and reached a record figure. The output of pig-iron in the United Kingdom rose from 2½ million tons in 1926 to over 7 million tons in 1927, while the production of steel ingots and castings rose from 3½ million tons to over 9 million tons. British steel-makers also made very great efforts during the year to reduce prices to meet foreign competition.

Other metals (Rs. 6,96 lakhs).—Imports of metals' other than iron and steel fell from 64,000 tons to 62,000 tons in quantity and from Rs. 7,06 lakhs to Rs. 6,96 lakhs in value. The imports of aluminium increased from 97,000 cwts. valued at Rs,95 lakhs in 1926-27 to 135,000 cwts. valued at Rs. 1,18½ lakhs in 1927-28.This represented a rise of 39 per cent. in quantity and of 25 per cent. in value.

Imports of brass decreased from 529,000 cwts. valued at Rs. 2,56½ lakhs to 508,000 cwts. valued at Rs. 2,33¾ lakhs. Mixed or yellow metal for sheathing,which formed 84 per cent. of the total quantity imported in 1927-28, increased slightly in quantity from 427,000 cwts. to 428,000 cwts. but declined in value from Rs. 2, 05 lakhs to Rs. 1,94½ lakhs. Imports from the United Kingdom increased from 121,000 cwts. valued at Rs. 60¼ lakhs to 168,000 cwts. valued at Rs. 75 lakhs. But, as in the preceding year, Germany retained her place as the chief supplier.

Imports of copper declined from 317,000 cwts. valued at Rs. 1,53 lakhs to 261,000 cwts. valued at Rs. 1,29 lakhs, Both unwrought and wrought copper (the latter consisting mostly of sheets) decreased,the former from Rs.24¾ lakhs to nearly Rs. 17 lakhs and the latter from Rs. 1,27 lakhs to Rs. 110 lakhs.

Machinery & Millwork (Rs. 16,99 lakhs)—In 1926-27 machinery and millwork had fallen to the fourth place in order of importance in India's import trade. In 1927-28 there was as considerable increase in imports and this head

ranked third in importance, coming next to cotton manufactures and iron and steel. The total imports of machinery of all kinds including belting for machinery and printing presses, during 1927-28 were valued at Rs. 16,99 lakhs, as compared with Rs. 14,60 lakhs in 1926-27 and Rs. 15,87 lakhs in 1925-26. An important contributing factor to the increase in the import trade was the removal or reduction of the custom duties on certain kinds of machinery from 1st October 1927, effected in pursuance of the recommendations of the Indian Tariff (Cotton Textile Board).

The value of all kinds of textile machinery imported increased by 23 per cent from Rs. 2,51½ lakhs to R3,08⅝ lakhs, of which the United Kingdom's supplies accounted for Rs. 2,89 lakhs or 94 per cent. In the preceding year she was responsible for 95 per cent of the imports) with a total value of Rs. 2,40 lakhs. Imports of cotton machinery were steadily on the decline for some years, but the tendency was arrested in 1927-28 imports amounting to Rs. 1,97 lakhs as compared with Rs. 1,70½ lakhs in 1926-27. Spinning and weaving machinery showed increases of Rs. 21 and Rs. 12 lakhs, respectively Jute manufacturing machinery advanced from Rs. 64¾ lakhs to Rs. 94 lakhs, while wool manufacturing machinery fell from Rs. 4 go Rs. 1⅝ lakhs. Imports of electrical machinery declined from Rs. 2,29¾ lakhs to Rs. 2,00 lakhs, decrease being noticiable in the case of transformers and generating plant.

Railway plant and rolling stock (Rs. 9,35 lakhs).—The total imports on private and Government account registered under this head (which,it may be remarked, excludes rails, chairs fishplates, etc., for railways) rose from Rs. 6, 08 lakhs to Rs. 9,35 lakhs,of which Rs.4,77 lakhs represented importations on private account and Rs. 4,58 lakhs on Government account as against R3,25 lakhs and R2,83 lakhs, respectively under corresponding heads in the preceding year.

Motor vehicles(Rs.6,18 lakhs).—There was a general lowering of the prices of motor vehicles during the year. This was due mainly to the reduction of the duty on motor cars and motor cycles from 30 to 20 per cent *ad valorem* and on pneumatic rubber tyres and tubes from 30 to15 per cent from 1st March 1927, and also to the keen competition in the automobile trade. The effect is plainly traceable in the import statistics. Leaving out of account 1920-21, when boom eondtions and lower duties prevailed, the year proved to be a record one for the imports of motor cars. The number of cars imported rose by 15 per cent from 13, 197 in 1926-27 to 15,122 in 1927-28, and their value by 20 per cent from Rs. 2,94 lakhs to Rs. 3,54 lakhs.

Sugar (Rs. 14,91 lakhs).—Increase in world production and fall in prices were the principal features of the sugar market. The world production of sugar in the season 1927-28 has been estimated at 25,118,000 tons, showing an increase of 1,371,000 tons over the preceding year, in spite of the reduction of the Cuban crop to 4 million tons. The actual production of the 1927-28 crop in Java has been estimated at 2,359,000 tons as compared with 1,960,000 tons in 1926-27. The total production of beet sugar in Europe in the season 1927-28 has been estimated at about 8 million tons as compared with nearly 7 million tons in the preceding year.

India draws the bulk of her supplies of sugar from Java. At the beginning of the year stocks of sugar in India were ample to meet demands and with prospects of a surplus crop, importers were content to postpone purchases till a lower level of prices was reached. Their attitude was also influenced by the fact that both Japan and China were ruled out as large buyers in consequence of financial troubles in the former country and civil turmoil in the latter At the same time, prospects of the beet crop in Europe were also bright and India remained the only big market available for Java. Consequently Indian importers were able to exert pressure on Java and bring down rates. During the first two months prices at Calcutta fluctuated between Rs. 11-0-0 and Rs. 11-8-0 per maund. In June prices fell below R11 and, with small fluctuations, dropped further to Rs. 10-2-0 per maund by the 22nd of July. In August and September the market was firmer,but in October prices again slummed,Rs.10-1-6 being reached on the 28th of the month. After a temporary spurt in November, prices again took a downward course in December and fell to R9-11-0per maund towards the close of January. This level was more or less maintained till nearly the close of March when a slight appreciation took place in consequence of a revival of Chinese demand for Java sugar.

In the Bombay market the quotation for Java, white, granulated, T.M.O. quality, stoop at Rs. 16-2-0 per cwt. (Rs. 11-13-7 per maund on the 1st April. There were temporary ups and downs during the rest of the month, but May saw a definitely lower tendency which carried prices to R14-8-0 per cwt. (R10-10-6 per maund) on the 8th July. August and September saw a slightly firmer market but rates sagged again in October, and continuedto show, on the whole, a downward tendency in succeding months,Rs. 14 per cwt. (Rs. 10-4-7 per maund) being recorded on the 23rd of February. The close of the year saw a firmer tendency, the quotation on the 30th March being Rs. 15-2-0 per cwt. (Rs.11-2-0 per maund).

Sugar.—Imports of sugar of all sorts excluding molasses, in 1927-28 declined from 826,900 tons valued at Rs. 18,36 lakhs to 725,800 tons valued at Rs. 14,50 lakhs. The decline was at the expense of beet sugar, while cane sugar actually recorded an increase as a result of low price.

Mineral Oils (Rs. 10,44 lakhs).—The total foreign imports of all kinds of mineral oils amounted to 232 million gallons valued at over Rs. 10,44 lakhs as compared with 184 million gallons valued at Rs. 8,89 lakhs in the preceding year. About 41 per cent. of the total imports consisted of kerosene oil, 46 per cent. of fuel oil and 11 per cent. of lubricating oils.

The table shows the sources of the imports of kerosene during the past three years and the pre-war year 1913-14. Imports from the United States of America, from which nearly half of the supplies were received as against 87 per cent. in the preceding year, amounted to over 47 million gallons valued at over Rs. 3,09 lakhs. Imports from Russia, including Georgia, amounted to over 19½ million gallons valued at Rs. 1,03 lakhs.

Provisions (Rs. 6,41 lakhs).—Imports of provisions, including confectionery, rose during the year to Rs. 6,41 lakhs from Rs. 5,78 lakhs in 1926-27. The principal heads which showed increases were biscuits and cakes, canned and bottled provisions, milk foods for infants and invalids, and condensed milk. Canned and bottled provisions which accounted for 47 per cent. of the total value of imported provisions rose from 537,000 cwts, to 667,000 cwts. in quantity and from Rs. 2,54 lakhs to Rs. 3,01 lakhs in value. The increase was due to larger receipts of vegetable product imports of which totalled 444,000 cwts. valued at Rs. 1,92 lakhs.

Liquors (Rs. 3,67 lakhs).—Imports of liquors during 1927-28 amounted to 7,118,000 gallons valued at Rs. 3,67 lakhs as against 6,261,000 gallons valued at Rs. 3,53 lakhs in 1926-27. There was thus an increase of 857,000 gallons or 14 per cent. in quantity and of Rs. 14 lakhs or 4 per cent. in value as compared with the preceding years' figures. The increase was shared by all the maritime provinces. Bengal with 2,142,000 gallons, valued at Rs. 1,09 lakhs occupied the first place among the distributing centres both as regards the quantity and the value of imports.

Paper and Paste board (Rs. 3,01 lakhs).—The quantity of paper and pasteboard imported rose by 4 per cent. from 100,400 tons in 1926-27 to 104,400 tons in 1927-28, but lower prices accounted for a decline in value by Rs. 7 lakhs to Rs. 3,01 lakhs. Imports of news printing paper fell from 20,900 tons to 16,000 tons and in value from Rs. 59½ lakhs to Rs. 39⅗ lakhs, while other kinds of printing paper advanced from 9,400 tons valued at Rs. 40⅗ lakhs to 10,900 tons valued at Rs. 44⅓ lakhs.

Chemicals (Rs. 2,63 lakhs)—The total imports of chemicals into India were valued at Rs. 2,65 lakhs in 1927-28 and showed an increase of Rs. 21 lakhs over the preceding year's figure of Rs. 2,44 lakhs. Soda compounds which accounted for 42 per cent. of the total value of the imports were valued at Rs. 1,12 lakhs, of which the United Kingdom supplied to the value of Rs. 95 lakhs.

Salt (Rs. 1,75 lakhs).—The quantity of foreign salt imported into India increased by 10 per cent. from 542,000 tons in 1926-27 to 596,000 tons in 1927-28, while the value of the shipments rose by 38 per cent. from Rs. 1,26 lakhs to Rs. 1,75 lakhs. It is estimated that about 90 per cent. of imported salt is fine white crushed salt, which is preferred by consumers in Bengal and also in Burma to salt of indigenous manufacture, while the remaining 10 per cent. is white uncrushed salt ("karkatch") used normally for cattle.

Coal (Rs. 62 lakhs).—Imports of foreign coal which suffered a serious set-back in 1926-27 in consequence of the British coal strike made some recovery during the year, arrivals totalling 263,000 tons, valued at Rs. 58½ lakhs, as compared with 142,000 tons valued at Rs. 31⅓ lakhs in the preceding year. There was thus an increase of 85 per cent. in quantity and of 86 per cent. in value. Compared with 1925-26, however, the figures showed a decrease of 29 per cent. in quantity and of 34 per cent. in value. Natal increased her supplies to 155,000 tons as compared with 114,000 tons in 1925-26 and 86,000 tons in 1926,27. Supplies from the United Kingdom, although higher than in 1926-27, were much below those of 1925-26 and

amounted to 52,300 tons. Portuguese East Africa also was unable to regain her former position and imports from that country amounted to 35,000 tons as compared with 126,000 tons in 1925-26. Australian coal was less in demand in Madras and Burma, these provinces showing a preference for Indian coal.

The following Table shows the principal sources of supply of foreign coal :—

——	1924-25.	1925-26.	1926-27.	1927-28.
	Tons.	Tons.	Tons.	Tons.
United Kingdom	108,000	97,000	13,000	52,000
Natal	3,000	4,000	86,000	155,000
Japan	10,000	1,000	11,000	6,000
Portuguese East Africa	118,000	126,000	26,000	35,000
Australia	14,000	12,000	13,000	9,000

Matches (Rs. 39 lakhs.)—Since the imposition of high specific duties on the imports of matches from March 1922 numerous match factories have been established in India, and a fair proportion of Indian requirements is now being met by locally produced matches. There has, therefore, been a substantial decline in the imports of foreign matches which fell from 11 million gross of boxes in 1923-24 to 7 million gross in 1924-25, 6 million gross in 1926-27 and to 3½ million gross in 1927-28. The corresponding value figures were Rs. 1,46 lakhs in 1923-24, Rs. 89 lakhs in 1924-25, Rs. 66 lakhs in 1926-27 and Rs. 39⅓ lakhs in 1927-28. The 1927-28 figures represented a decrease of 42 per cent. in quantity and 40 per cent. in value as compared with 1926-27.

The following table shows the comparative importance of the principal articles exported from British India :—

(In thousands of Rupees)

	1923-24.	1924-25.	1925-26.	1926-27.	1927-28.	Percentage of proportion to total exports of merchandise in 1927-28.

Jute and Jute Manufactures (Rs. 84,23 lakhs)).—Two successive good crops and a steady demand for both the raw material and manufactured articles enabled the total exports during the year under this head to beat previous records as regards the quantity shipped.

The total weight of raw and manufactured jute exported during the year amounted to 1,777,000 tons, or 208,000 tons more than in the preceding year, while the total value increased from Rs. 80 crores to Rs. 84·2 crores, Raw jute accounted for 36 per cent. of this value and jute manufactures for 64 per cent. as compared with 33 and 67 per cent. respectively in 1926-27. The following statement compares the quantities exported during 1913-14 and each of the past three years:—

—	1913-14.	1925-26.	1926-27.	1927-28.
Jute (in thousand tons)	768	647	708	892
Bags (in millions)	369	425	449	463
Cloth (in million yards)	1,061	1,461	1,503	1,553

Cotton(Rs. 47,72).—The Indian cotton crop of the season 1927-28 has been estimated at 5,871,000 bales of 400 lbs. each as compared with 5,024,000 bales in the preceding year. The American crop of 1927 was a short one, unlike the crops of the three preceding years, its yield being estimated at 12,955,000 bales of 500 lbs. each (16,194,000 bales of 400 lbs. each). The Egyptian crop of the season also gave a smaller yield, the output being estimated at 1,496,000 bales of 400 lbs.

Exports of Indian cotton in bales of 400 *lbs.*

March	295,800	633,200	545,700	576,700	384,800
TOTAL ...	2,407,300	3,326,400	4,173,400	3,188,000	2,686,200

Exports from Bombay were 63 per cent. of the total quantity of raw cotton exported, those from Karachi 27 per cent. and from Madras 5 per cent. as compared with 66,26. and 5 per cent respectively in 1926-27.

Cotton Manufactures (Rs. 8,67 lakhs).—The cotton industry passed through another period of depression in 1927-28. Production both of yarn and piece goods increased, but exports declined and stocks accumulated. The production of yarn in Indian mills in 1927-28 increased to 809 million lbs. as compared with 807 million lbs. in the preceding year and 687 million lbs. in 1925-26.

Exports of yarn fell by 40 per cent. in quantity from 41½ million lbs. in 1926-27 to 24¾ million lbs. in the year under review. The average exports in the five years ending 1913-14 were 193 million lbs. while the average of the war period was 130 million lbs, and of the post-war quinquennium 82 million lbs. The value realised fell from Rs. 3,08½ lakhs to Rs. 1,88 lakhs, a decline of 39 per cent. China, usually the most important market, took only .8 million lbs., as compared with 16.8 million lbs. in the preceding year. Far from being a buyer, she was actually selling large quantities of her cotton yarn in the Indian market, undercutting both the local product and the imports from other sources.

Piece-goods (Rs. 6,18½ lakhs).—The production of piece-goods in Indian mills in 1927-28 increased in quantity by 4 per cent. as compared with the preceding year. The proportion of the exports of piece-goods to the total production was 7 per cent. in 1927-28 as compared with 8.7 per cent. in 1926-27 and 8.4 per cent. in 1925-26. The actual quantity exported compared with that of the preceding year, declined by 29 million yards.

Foodgrains and flour (Rs. 42,92 lakhs).—Exports under this head made some recovery, as a result chiefly of larger shipments of wheat. The total quantity exported amounted to 2,784,000 tons as against 2,429,000 tons in the preceding year, the value of the shipments rising by Rs. 3,67 lakhs to Rs. 42,92 lakhs. Shipments of wheat increased by 70 per cent. from 176,000 tons to 300,000 tons and rice not in the husk by 117,000 tons to 2,152,000 tons. Exports of barley, which were insignicant in the preceding year, amounted to 72,000 tons. Other items also showed small increases. The detailed exports during the past three years, compared with the average exports under each head in the pre-war quinquennium, are set forth in the table below :—

—	Pre-war average.	1925-26.	1926-27.	1927-28.

Tea (Rs. 32,48 Lakhs).—The tea industry had another prosperous season in 1927-28. The production of tea in the season fell short of the preceding year's record, but exports rose, and prices throughout the season were well maintained.

The total production of tea in India in 1927 is estimated at 391 million lbs. as compared with 393 million lbs. in 1926 and 364 million lbs. in 1925. As usual, Assam contributed the largest share, her production being 60 per cent. of the total output, while Northern India, excluding Assam, contributed 26 per cent. and Southern India 14 per cent. The total area under tea in 1927 was 753,000 acres as against 739,000 acres in 1926.

TOTAL ..	214,224	338,470	340,107	325,733	349,264	361,614

In 1927-28, 92 per cent. of the total quantity of tea produced in India was export overseas.

Oilseeds (Rs. 26,69 Lakhs.)—Oilseeds occupied the fifth place among exports, the first four being raw and manufactured jute, cotton, food-grains and tea. Indian supplies were moderately satisfactory and in the case of groundnuts plentiful, while demand improved considerably. The total exports amounted to 1,210,000 tons valued at Rs. 26,69 lakhs, showing an increase of 44 per cent. in quantity and 40 per cent. in value over the preceding year's figures. Compared with the pre-war average there was, however, a decrease of 17 per cent. in quantity but an increase of 9 per cent. in value. The table shows the average quantities of the principal seeds exported during the last three years and the pre-war quinquennium.

	Pre-war	1925-26	1926-27	1927-28

TOTAL ..	1,453	1,250	838	1,210

Hides and Skins (Rs. 17,88 Lakhs).—The trade showed a marked improvement in 1927-28 owing to a world shortage of hides and leather. The leather stocks of the world have been greatly depleted, and the available supply of hides is insufficient to meet the increasing demand. Prices advanced, hides and heavy leather benefits most, and the total exports under this had increased in value by 23 per cent. to Rs. 17·88 lakhs. Tanned hides contributed most to this increase, but was followed closely by raw hides. Shipments of raw hides and skins during the year amounted to 64,400 tons valued at Rs. 8,81 lakhs as compared with 50,600 tons valued at Rs. 7,18 lakhs in 1926-27. Sixty-three per cent. of the exports consisted of raw hides which advanced by 12,800 tons to 40,700 tons in quantity and by Rs. 1,27 lakhs (49 per cent.) to Rs. 3,85 lakhs in value. Raw skins, on the other hand, had less demand and fell slightly to 19,400 tons as compared with 19,700 tons in 1926-27, though the value of the shipments increased by 7 per cent. or Rs. 33 lakhs to Rs. 4,89 lakhs. Exports of tanned or dressed hides and skins increased from 18,400 tons to 23,300 tons in quantity and in value from Rs. 7,37⅔ lakhs to Rs. 9,07½ lakhs. Tanned hides advanced from 11,300 tons valued at Rs. 2,78 lakhs to 15,800 tons valued at Rs. 4,12 lakhs, a quantity increase of 39 per cent. and a value increase of 48 per cent. Tanned skins gained by 500 tons (6 per cent.) in quantity and by Rs. 35⅔ lakhs (8 per cent.) in value.)

Lac (Rs. 6,99 Lakhs).—The exports of lac fell by 8 per cent. in quantity from 592,000 cwts. in 1926-27 to 544,000 cwts. in 1927-28, but higher prices accounted for an increase in value by 28 per cent. from Rs. 5,47 lakhs to Rs. 6,99 lakhs. Of the total quantity shipped in 1927-28 about 74 per cent. represented shellac, and 3 per cent. button lac, while the remaining 23 per cent. consisted of seed lac, stick lac and other sorts.

Raw wool (Rs. 4,36 Lakhs).—The trade in raw wool continued to expand, exports rising from 45 million lbs. to 50 million lbs. in quantity and from Rs. 3,93 lakhs to Rs. 4,36 lakhs in value. Of the total quantity shipped, the United Kingdom took nearly 44 million lbs. or 87 per cent. as compared with 40½ million lbs. or 91 per cent. in the preceding year, while the remainder went mainly to the United States of America, shipments to which country rose from 3.6 million lbs. to 5·2 million lbs. Besides Indian wool, a fairly large proportion of foreign wool of Tibetan and Central Asian origin, imported across the frontier, is re-exported from India.

Oils (Rs. 71 Lakhs).—The total value of the exports of oils of all sorts as compared with the preceding year declined by Rs. 25 lakhs or 26 per cent. to Rs. 71 lakhs in 1927-28. Owing chiefly to increase in home consumption, exports of petroleum, dangerous, flashing below 76° F. (including petrol, benzine and benzol) fell from 8 million gallons in 1925-26 and 2 million gallons in 1926-27 to only 2,900 gallons in 1927-28. The corresponding value figures were Rs. 92 lakhs in 1925-26, Rs. 24 lakhs in 1926-27 and Rs. 3,500 only in 1927-28. On the other hand, the total sales of petrol in India continued to advance and amounted to nearly 45 million gallons in 1927 as compared with 33 million gallons in 1926 and 26 million gallons in 1925.

Exports of vegetable oils fell from 1,307,000 gallons valued at Rs. 31 lakhs to 1,93,000 gallons valued at Rs. 29 lakhs.

Metals and ores (Rs. 8,97 Lakhs).—The total exports of ores amounted to 760,000 tons as compared with 584,000 tons in the preceding year.

Manganese ore represented 93 per cent of the total quantity of ores exported. Exports of manganese ore increased from 536,000 tons valued at Rs. 1,49 lakhs to 704,000 tons valued at Rs. 1,95 lakhs. Nearly 424,000 tons were shipped from Bengal and 266,000 tons from Bombay, while the remainder was sent from Madras. Imports into the United Kingdom were low during the preceding year, owing to the depression in the British steel industry consequent on the coal strike of 1926. The demand from the United Kingdom revived and she took 234,000 tons as against 58,000 tons in the preceding year. Germany took nearly 15,000 tons and the Netherlands an equal amount. German demands have not yet recovered to the 1925-26 level when she took more than 30,000 tons. Belgium took 182,000 tons and France 150,000 tons as against 186,00 tons and 168,000 tons respectively in the preceding year. Japanese imports of Indian manganese ore amounted only to 3,300 tons as compared with 20,500 tons in the preceding year. The United States of America increased her requirements

to 97,200 tons from 71,300 tons in 1926-27.

Pig Iron (Rs. 1,79 Lakhs.—The production of pig iron in India increased from 957,000 tons in 1926-27 to 1,162,000 tons in 1927-28 and exports from 309,000 tons to 393,000 tons. The value of the exports rose from Rs. 1,40 lakhs to Rs.1,79 lakhs. Japan, the largest buyer, increased her takings from 234,000 tons to 271,000 tons and the United Kingdom from 16,000 tons to 21,000 tons.

The following figures show the production of pig iron and steel in India during the past three years. The figures are in thousands of tons.

—	1925-26	1926-27	1927-28

† Lst. is Local Standard Time at the Port and it varies with the Geographical Position.

The Indian Stores Department.

The Indian Stores Department was instituted on 1st January 1922, after a specially appointed officer had during the preceding year investigated its possible sphere of work. The Government of India nearly half a century previously enunciated the policy of purchasing for State use stores of indigenous origin or manufacture rather than stores produced or manufactured abroad and for many years before the creation of the new department the rules governing stores purchase for public departments prescribed that subject to certain conditions as to quality and so forth preference should be given to articles manufactured wholly or in part in India. Revisions of these rules to make them better serve the purpose for which they were drafted were from time to time made but as Indian industrial development progressed and as Indian nationalism increased complaints that the policy presumed to be embodied in the rules was not in effect carried out grew in volume. The Indian Industrial Commission found that the industrial resources of the country were far from sufficiently utilised by Government Departments but that the reason was not due to restrictions in the stores purchase rules but to the failure of the Departments fully to avail themselves of the scope which the rules offered. They attributed this to lack of information as to sources and market values of Indian supplies and to the absence of inspecting agencies and they concluded that a central expert agency for the purchase and inspection of stores required for public purposes should be established. The Stores Purchase Committee which the Government of India appointed to advise them on this question unanimously supported the same conclusion and Government with the approval of the Secretary of State accepted the principles of the recommendation. The Indian Stores Department was thereupon instituted.

It was designed primarily to deal with the requirements of the Central purchasing departments and with those of the minor administrations directly controlled by the Government of India, it being impossible under the Reforms Constitution for the Government of India to compel the Provincial Governments similarly to utilise its services. The Central Government at the same time invited use of its services by Provincial Governments, Municipalities, Port authorities, company managed railways and other public or semi-public bodies.

Organisation.—The preliminary organisation of the Stores Department constituted on 1st January 1922 included as gazetted staff—

A Chief Controller of Stores.

A Director of Inspection.

A Director of Purchase and Intelligence.

A Director of Textiles Purchase.

An Assistant Chief Controller.

The designation of the Director of Textiles Purchase was early changed to Deputy Director of Purchase (Textiles) and within the first year an Assistant Controller of Textiles Purchase was appointed. The Department's growth has thus from its beginning constantly broadened and accelerated. The preliminary organisation was instituted temporarily but the department and its organisation were before the end of 1922 put on a permanent basis. The offices of Superintendent of Local Manufactures and Government Test House at Alipur and of the Metallurgical Inspector at Jamshedpur, hitherto under the direct administration of the Industries and Labour Department, were in July 1922 absorbed in the new organisation.

The number of gazetted officers in the department by the end of 1927-28 was 32 Europeans and 30 Indians.

The Functions of the new Department were early indicated as being—

(*a*) To act, subject to certain limitations, as a purchasing and inspection agency and in an advisory capacity on all matters connected with the purchase of stores in their widest sense for the public service on behalf of all Central Departments of Government and of the minor Local Governments and also on behalf of such major Local Governments, company worked railways, Corporations, Port Trusts, Municipalities and similar quasi-public bodies and Indian States as may desire to avail themselves of its assistance;

(*b*) To scrutinise the Home indents of all Central Departments, minor Local Governments and such other authorities as utilise its services with a view to ensure attention to the encouragement of Indian industries, so conducting its operations in this respect as to prevent the purchase of articles of non-Indian manufacture when goods of indigenous production of suitable quality and price are obtainable;

(*c*) To purchase and inspect in India for central departments and other buyers on the lines above indicated certain specified commodities;

(*d*) To inspect stores purchased otherwise than through the agency of the department;

(*e*) To draw up for the approval of departments and others which effect their purchases through the department specifications of the various classes of stores in demand and if so desired to advise and assist departments and others which make their own purchases in the preparation of specifications and the standardisation of patterns;

(*f*) To act as a central bureau of information on all matters affecting the purchase of stores and their prices, particularly with reference to the extent of Indian manufactures and their capacity from time to time.

In order to secure the benefit of the accumulated experience of over sixty years of purchase and inspection work in the foremost markets of the world which had been acquired by the India Store Department in London, advantage was taken of the presence of the Director of Purchase and Intelligence on leave in England to depute him to examine the system in force in the London organisation with a view to the embodiment of what was useful to the Indian Stores Department in its organisation and methods. It was at the outset decided that the Department should be quasi-commercial and self-supporting, charging a small percentage

upon the cost of its purchases and other minimum fees in other branches of activity to defray its establishment and other costs.

Past Year's Work.—The latest statistics of the work and progress of the Department are contained in its recently issued report for the official year 1927-28. They show that the total value of purchases for Government Departments by the Stores Department in that year was Rs. 3,73,03,846 against Rs. 3,98,82,245 in the preceding year. The drop occurred under the heading 'textiles' and was due partly to wider competitionand lower prices and partly to a change in Army Department purchasing procedure, which transferred purchase operations forward to the year in which stores are taken and paid for. Preference without sacrifice of economy or efficiency is given to goods of Indian origin and manufacture and in order to assist Indian manufacturers trial orders for great coat cloth and serge drab mixture, of both of which large quantities are required for the army, were placed with Indian mills at prices higher than those at which the materials could have been obtained from abroad. "It is anticipated that Indian manufacturers will be able in due course of time to produce these materials at rates which will compare favourably with those quoted by their foreign competitors and that it will be possible to obtain from Indian sources the full quantity of these materials required for the army in India."

The value of engineering and allied stores purchased through the Department in 1927-28 was Rs. 2,54,21,933, as against Rs. 2,35,95,952 in 1926-27. Approximately half were "engineering" stores, such as electrical generating plant, excavating machinery, workshop machinery, steel structures, cranes, sluice and regulator gates, steel barges, pipes, steel tanks, road rollers, electric motors, fans, cables, lamps, meters and other accessories. "Wherever possible, notably in respect of cement, oils, paints and steel work, stores of Indian manufacture and origin (wholly or partly) were obtained, but in the case of other engineering plant and machinery the bulk of the expenditure was necessarily incurred on the products of foreign countries." The central Departments, in particular the ArmyDepartment, contributed most largely to the increase in the volume of these transactions, the purchases in their behalf having risen by 47 per cent. compared with the preceding year. The Provincial Governments, railway administrations, Indian States and various public bodies mainly contributed the remainder.

The potentialities of Indian sources of supply are constantly explored and the investigation resulted in 1927-28 in the addition of 326 firms to the Department's list of approved contractors and to the lists of firms for the supply of articles for the public service. Applications for registration from 76 firms were rejected on the ground that the firms were unsuitable and 106 firms were removed from the list as being no longer useful. The Department continually endeavours to assist manufacturers to improve the quality of the products, so as to bring them up to standard, and great progress has been made in this respect, particularly in respect of textiles.

Investigations are continually made by the Department into the potentialities of Indian sources of supply. The list of approved contractors was in 1926-27 increased by 278 and application for registration from 109 other firms were rejected. During the same year 1928 indents on the India Stores Department, London, of an estimated value of Rs. 8,81,53,278, were received for scrutiny. The growth of the revenue of the Department has recently exceeded that of its expenditure and as a result there was in 1926-27 a marked decrease in the net deficit on revenue account, which in 1926-27 stood at about Rs. 29,500 as compared with about Rs. 2-15 lakhs in the last preceding year. The expenditure included in this calculation does not include pensions and contributions to provident fund, rents of Government buildings, cost of printing and stationery and certain other indirect charges and it is therefore calculated that considerable increase in the volume of business done must take place before the Department can be self-supporting in the true sense of the term.

Bombay Stamp Duties.

	Rs.	a.
Acknowledgment of Debt ex. Rs. 20 ..	0	1
Affidavit or Declaration	2	0
Agreement or Memo. of Agreement—		
(a) If relating to the sale of a bill of exchange	0	4
(b) If relating to sale of a Government security, or share in an incorporated company or other body corporate—Subject to a maximum of Rs. 20, a. 2 for every Rs. 10,000 or part.

Exc. Rs. 200 & does not exc. Rs. 300	2	4
Up to Rs. 1,000, every Rs. 100 or part	0	12
For every Rs. 500 or part, beyond Rs. 1,000	3	12
Bond, Administration, Customs, Security or Mortgage Deed—For amount not exceeding Rs. 1,000, same duty as a Bond.		
In any other case..	10	0
Cancellation	5	0
Certificate or other Document relating to Shares	0	2
Charter Party	2	0
Cheque and demand drafts are exempt from stamp duty with effect from 1st July 1927.		
Composition—Deed	20	0
Conveyance, not being a Transfer—		
Not exceeding Rs. 50	0	8
Exceeding Rs. 50 not exceeding Rs. 100	1	0
Exceeding Rs. 100 but does not exceed Rs. 200	2	0
Exceeding Rs. 200 but does not exceed Rs. 300	4	8
For every Rs. 100 or part in excess of Rs. 100 up to Rs. 1,000	1	8
For every Rs. 500, or part thereof, in excess of Rs. 1,000..	7	8

Conveyance of landed property in Bombay City.—In respect of any instrument (not being a lease or transfer of a lease as defined in the Indian Stamp Act II of 1899, or an under-lease or sub-lease or an agreement to let or sub-let or a power-of-attorney) relating to immoveable property situate *within the City of Bombay*, for the entries in article 23 the following entries shall be substituted, namely :—

23. Conveyance (as defined by section 2 (10) not being a Transfer changed or exempted under No. 62—

	Rs.	a.
Where the amount or value of the consideration for such conveyances as set forth therein does not exceed Rs. 50	0	8
Where it exceeds Rs. 50 but does not exceed Rs. 100	1	0
Where it exceeds Rs. 100 but does not exceed Rs. 200	2	0
Where it exceeds Rs. 200 but does not exceed Rs. 300	8	8
Where it exceeds Rs. 300 but does not exceed Rs. 400	12	0
Where it exceeds Rs. 400 but does not exceed Rs. 500	15	8
Where it exceeds Rs. 500 but does not exceed Rs. 600	19	0
Where it exceeds Rs. 600 but does not exceed Rs. 700	22	8
Where it exceeds Rs. 700 but does not exceed Rs. 800	26	0
Where it exceeds Rs. 800 but does not exceed Rs. 900	29	8
Where it exceeds Rs. 900 but does not exceed Rs. 1,000	33	0
And for every Rs. 500 or part thereof in excess of Rs. 1,000	17	8
Copy or Extract—If the original was not chargeable with duty, or if duty with which it was chargeable does not exceed 1 Rupee..	1	0
In any other case	2	0
Counterpart or Duplicate—If the duty with which the original instrument is chargeable does not exceed one rupee—The same duty as is payable on the original. In any other case	2	0
Delivery Order	0	1
Entry in any High Court of an Advocate or Vakil	500	0
In the case of an Attorney	500	0
Instrument—Apprenticeship	10	0
Divorce	2	0
Other than Will, recording an adoption or conferring or purporting to confer Authority to adopt	20	0

Lease—Where rent is fixed and no premium is paid for less than 1 year, same duty as Bond for whole amount; not more than 3 years, same as Bond for average annual rent reserved; over 3 years, same as Conveyance for consideration equal to amount or value of the average annual rent reserved; for indefinite term, same as Conveyance for a consideration equal to the amount or value of the average annual rent which would be paid or delivered for the first ten years if the lease continued so long; in perpetuity, same as Conveyance for consideration equal to one-fifth of rents paid in respect of first 50 years. Where there is premium and no rent, same as Conveyance for amount of premium; premium with rent, same as Conveyance or amount of premium in addition to the duty which would have been payable on the lease if no fine or premium or advance had been paid or delivered.

	Rs.	a.
Letter—Allotment of Shares	0	2
Credit	0	2
License	10	0
Memo. of Association of Company—If accompanied by Articles of Association	30	0
If not so accompanied	80	0
Notarial Act	2	0
Note or Memo. intimating the purchase or sale—		
(*a*) Of any Goods exceeding in value Rs. 20	0	4
(*b*) Of any Stock or marketable Security exceeding in value Rs. 20—Subject to a maximum of Rs. 20, a. 2 for every Rs. 10,000, or part.		
Note of Protest by a Ship's Master ..	1	0
Partnership—Where the capital does not exceed Rs. 500	5	0
In any other case	20	0
Dissolution of	10	0
Policy of Insurance—		
(1) *Sea*—Where premium does not exceed rate of 2a., or ⅛ per cent. of amount insured	0	1
In any other case for Rs. 1,000 or part thereof	0	2
(2) *For time*—For every Rs. 1,000 or part insured, not exc. 6 months ..	0	2
Exceeding 6 and not exceeding 12 months	0	4
If drawn in duplicate, for each part.—Half the above rates, for Sea and Time.		
(3) *Fire*—When the sum insured does not exceed Rs. 5,000..	0	8
In any other case	1	0

In respect of each receipt for any payment of a premium on any renewal of an original policy—One half of the duty payable in respect of the original policy in addition to the amount, if any chargeable under Art. 53 (*Receipt*).

	Rs.	a
(4) *Accident and Sickness*—Against Railway accident, valid for a single journey only	0	1
In any other case—for the maximum amount which may become payable in the case of any single accident or sickness where such amount does not exceed Rs. 1,000, and also where amount exc. Rs. 1,000, for every Rs. 1,000 or part	0	2
(5) *Life, or other Insurance, not specifically provided for*—		
For every sum insured not exceeding Rs. 1,000 and also for every Rs. 1,000 or part	0	6
If drawn in duplicate, for each part	0	3
Insurance by way of indeminty against liability to pay damages on account of accidents to workmen employed by or under the insurer or against liability to pay compensation under the Workmen's Compensation Act of 1923. For every Rs. 100 or part payable as premium ..	0	1
In case of a re-insurance by one Company with another—¼ of duty payable in respect of the original insurance, but not less than 1 anna, or more than 1 Re.		
Policies of all classes of Insurance not included in Article 47 of Schedule 1 of Stamp Act of 1899 covering goods, merchandise, personal effects, crops and other property against loss or damage, are liable to the same duty as Policies of Fire Insurance.		
Power of Attorney—		
For the sole purpose of procuring the registration of one or more documents in relation to a single transaction or for admitting execution of one or more such documents	1	0
When required in suits or proceedings under the Presidency Small Causes Courts Act, 1882	1	0
Authorising 1 person or more to act in a single transaction other than that mentioned above	2	0
Authorising not more than 5 persons to act jointly and severally in more than 1 transaction, or generally ..	10	0
Authorising more than 5 but not more than 10 persons to act	20	0
When given for consideration and authorising the Attorney to sell any immovable property—The same duty as a *Conveyance* for the amount of the consideration.		
In any other case, for each person authorised	2	0
Promissory Notes—		
(*a*) When payable on demand—		
(i) When the amount or value does not exceed Rs. 250	0	1
(ii) When the amount or value exceeds Rs. 250 but does not exceed Rs. 1,000	0	2

	Rs.	a.
(iii) In any other case	0	4
(b) When payable otherwise than on demand—The same duty as a Bill of exchange for the same amount payable otherwise than on demand.		
Protest of Bill or Note	2	0
Protest by the Master of a Ship	2	0
Proxy	0	2
Receipt for value exc. Rs. 20	0	1
Reconveyance of mortgaged property— (a) If the consideration for which the property was mortgaged does not exceed Rs. 1,000—the same duty as a bond for the amount of such consideration as set forth in the Reconveyance.		
(b) In any other case	10	0
Release—that is to say, any instrument whereby a person renounces a claim upon another person or against any specified property— (a) If the amount or value of the claim does not exceed Rs. 1,000—The same duty as a Bond for such amount or value as set forth in the Release.		
(b) In any other case	10	0
Respondentia Bond—The same duty as a Bond for the amount of the loan secured.		
Security Bond—(a) When the amount secured does not exceed Rs. 1,000—The same duty as a Bond for the amount secured.		
(b) In any other case	10	0
Settlement—The same duty as a Bond for the sum equal to the amount or value of the property—settled as set forth in such settlement.		
Revocation of Settlement.—The same duty as a Bond for a sum equal to the amount or value of the property concerned as set forth in the instrument of revocation but not exceeding ten rupees.		
Share-warrant to bearer issued under the Indian Companies Act.—One and a half times the duty payable on a conveyance for a consideration equal to the nominal amount of the shares specified in the warrant.		
Shipping Order	0	1
Surrender of Lease—When duty with which lease is chargeable does not exceed Rs. 5—The duty with which such Lease is chargeable.		
In any other case	5	0
Transfers of Shares—One-half of the duty payable on a Conveyance for a consideration equal to the value of the share.		
Transfer of any Interest secured by a Bond, Mortgage-deed, or Policy of Insurance—If duty on such does not exceed Rs. 5—The duty with which such Bond, &c., is chargeable.		
In any other case	10	0
—of any property under the Administrator General's Act 1874, Section 31..	10	0
—of any trust property without consideration from one trustee to another trustee or from a trustee to a beneficiary—Five rupees or such smaller amount as may be chargeable for transfer of shares.		
Transfer of Lease by way of assignment and not by way of under-lease—The same duty as a conveyance for a consideration equal to the amount of the consideration for the transfer.		
Trust, Declaration of—Same duty as a Bond for a sum equal to the amount or value of the property concerned, but not exceeding	15	0
Revocation of—Ditto, but not exceeding	10	0
Warrant for Goods	0	8

PROVING OF WILLS.

In British India if a person has been appointed executor of the will of a deceased person, it is always advisable to prove the will as early as possible. If the will is in a vernacular it has to be officially translated into English. A petition is then prepared praying for the grant of probate of the will. All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition. The values of immoveable properties are usually assessed at 16⅔ years purchase on the nett Municipal assessment. For estate under Rs. 10,000 the probate duty payable is 2%; between Rs 10,000 and Rs. 50,000 the duty payable is 2½%. Over 50,000 rupees the duty payable is 3%. In determining the amount of the value of the estate for the purposes of probate duty the following items are allowed to be deducted:—

1. Debts left by the deceased including mortgage encumbrances.
2. The amount of funeral expenses.
3. Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest.

The particulars of all these items have to be stated in a separate schedule. It is the practice of the High Court to send a copy of these schedules to the Revenue authorities and if the properties particularly immoveable properties have not been properly valued, the Revenue department require the petition to be amended accordingly. In certain cases the Court then requires citations to be published and served on such persons as the Court thinks are interested in the question of the grant of probate. If no-objection is lodged by any person so interested within 14 days after the publication or service of citation and if the will is shown to have been properly executed and the petitioner entitled to probate, probate is ordered to be granted.

The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the Indian Year Book. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year, the fundamental principles of the Congress were laid down to be:—

> Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;
>
> Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and
>
> Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the Extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

"The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country."

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal. But the union then effected was purely superficial; the difference between the Moderates and the Extremists was fundamental; the Extremists captured the machinery of the Congress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi and his lieutenants. In 1927 the Congress actually adopted independence as the goal of India. This resolution was, however, slightly modified next year when it was declared that, while the Congress adhered to the independence resolution, Dominion Status, it was stated, would be acceptable if it were granted before the end of 1929.

THE NON-CO-OPERATION MOVEMENT.

It was in 1920 that Mr. Gandhi, who had only in the previous year unsuccessfully started his Passive Resistance struggle as a protest against the Rowlatt Act, conceived his idea of non-co-operation. Originally intended to be a protest against the British policy towards Turkey, the "fighting" of two other grievances was later on added to its first object, namely, the punishment of officials in the Punjab Martial Law regime and the securing of Swaraj for India. Mr. Gandhi and Mr. Shaukat Ali were able in 1920 to get the Calcutta Special Congress to endorse their programme of "progressive non-violent non-co-operation" which was reiterated by the annual session at Nagpur, which, on Mr. Gandhi's motion, changed its old creed into "the attainment by India of Swaraj by all legitimate and peaceful means." The stern measures adopted by local Governments led to the imprisonment of a large number of active Congressmen with the result that the Ahmedabad Congress in 1921 made a "grim resolve" to challenge the "repression movement" by appointing Mr. Gandhi as dictator and by resolving to start a "No Tax" campaign at Bardoli. The riots in Chauri Chaura in 1922, preceded by the Bombay riots in 1921 during the Prince of Wales' visit (see 1923 and 1924 editions of this book) opened Mr. Gandhi's eyes to the impossibility of maintaining a non-violent atmosphere under exciting conditions. He suspended his proposed civil disobedience campaign, and replaced it by what is known as the Bardoli Programme which suspended all the aggressive items of non-co-operation in favour of the promotion of inter-communal unity and khaddar. Soon after, Mr. Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for six years. (See 1923 and 1924 editions.)

This turn of events threw cold water on the enthusiasm of non-co-operators who got discouraged. In order, therefore, to sound the country's readiness for aggressive action once more, the All-India Congress Committee appointed a Committee, known as the Civil Disobedience Committee, in June 1922. The Committee toured the country and in October, 1922, produced two reports, one favouring Council entry to offer obstruction to Government and the other recommending the adoption of the Bardoli programme. A battle royal ensued between the two parties at the Gaya Congress. The anti-Council Party won the day, and the Councilites, led by the Congress President, Mr. C. R. Das, formed the Swarajya Party in order to push their own Council programme. The Swarajya Party by its continuous propaganda gained considerable support in the country. The No-Change Party seeing the trend of public

opinion got the Congress to lift the ban on Council entry. The Swarajists secured a large number of seats in various provincial Councils and in the Assembly. The annual Congress at Cocanada, under the presidentship of Mr. Mahomed Ali, put an end, at any rate for some time, to the Council entry controversy.

The Congress had an eventful career in 1924. Mr. Gandhi, who had an attack of appendicitis of a serious form in the Yerowda Jail, was released by the Government of Bombay. Immediately, the No-Changers revived their hopes of fighting the Swarajists to a finish. After nearly six weeks' discussion, in May, 1924, Mr. Gandhi definitely dissociated himself from the Council Programme and the Swarajist obstructive policy; while the Swarajist leaders in a separate statement defended their policy. Public controversy again centred round the Council question. In the meanwhile, the Government of Bengal with the sanction of the Governor-General promulgated an Ordinance in order to check the forces of the growing revolutionary movement in Bengal. Under this Ordinance and under Regulation III of 1818 they effected several arrests including a few Swarajists. Mr. Gandhi went to Calcutta and, after a series of consultations with the Swarajist leaders, drew up what is now known as the Gandhi-Swarajist Pact by which Mr. Gandhi agreed to suspend the non-co-operation movement and to recognise the Swarajists as the accredited representatives of the Congress on legislative bodies, while in return the Swarajists agreed to his spinning franchise which laid down 2,000 yards of hand-spun yarn every month as the subscription to Congress membership instead of the four annas a year as decided by the Nagpur Congress.

The Congress which met at Belgaum during Christmas week under Mr. Gandhi's presidency endorsed the Bengal Pact. Among the other resolutions passed by the Congress was one suspending the non-co-operation programme. Non-co-operation was thus practically dead, and, strange to say, it received its death-blow at the hands of the very author of its being. But the fond parent did not lose heart and bided his time. His chance came in 1928 when the Congress was split into two warring camps. One was ready to accept Dominion status for India, while the other would have nothing short of independence. At the psychological moment, Mr. Gandhi staged a re-entry into the political arena—he had been but a silent spectator during the five preceding years—and, professing to effect a compromise within the Congress, provided a loophole for the revival of non-co-operation. Although he made it conditional on the refusal to concede Dominion status within a year, he must have been sure—as everyone is sure that Dominion status cannot and will not be granted in the short space of a year—that the condition is only a farce and that he will have certain chance of again bolstering up his pet formula.

Congress in 1925-27.

The policy of the Congress executive during the first half of 1925 was one of aimless drift. The death of Mr. C. R. Das demoralised the Swarajists. Mr. Gandhi promptly went to their rescue and at the end of the year the Swarajists' political programme was formally adopted by the Cawnpore Congress. Of a more far-reaching character was the split that occurred in the ranks of the Swarajists themselves at Cawnpore. Messrs. Jayakar and Kelkar from Bombay and Dr. Moonje from the C. P. registered their emphatic protest and resigned their seats on the Legislatures professing thereby to liberate themselves from the Swarajist obligations and desiring to be free to propagate their own cult of Responsive Co-operation and acceptance of office.

The Responsive Co-operators, who had in the meanwhile strengthened their position and secured appreciable support to their creed of co-operation when possible and opposition when necessary, led the country's attack on the Swarajists.

The 41st session of the Congress, which met in Assam during Christmas week in 1926, set its face against the acceptance of ministerships or other offices in the gift of the Government and approved of the policy of rejection of budget and refusal of supplies until a response to the "national demand" was forthcoming.

The Congress activities in 1927 bore distinct traces of the character of the President, Mr. S. Srinivasa Iyengar—in particular, his inordinate ambition to glorify his presidency by the achievement at any price of communal and political unity and his general weakness resulting from a desire to placate opponents, humour friends and please all. It was an impossible task and impossible it proved to be. The decision of the Gauhati Congress against the acceptances by Congressmen of ministerships definitely alienated the Responsivists. The Liberals were claiming the Responsivists who were still in the Congress but not of it. While the political influence of the Congress in the country was confined to the handful of Swarajists with their dull and destructive tactics, the communal tension was worsening day by day leading to alarmingly frequent outbreaks of riots and minor disturbances. Every Hindu procession particularly in Northern India, and every Mahomedan festival became a "head-line event" and it was with much relief that one read ".......passed off quietly." This communal antagonism was doubtless a disquieting feature of the country's advance and the leaders were not blind to it. But frantic efforts were productive of no more than pious paper resolutions which were broken before the ink had dried.

The first move of importance in the direction of communal unity was what were known as the Delhi proposals, which a body of leading Mussulamans gathered at Delhi offered at the instance of Mr. Jinnah to the Hindu community. Although a minority community, the Mahomedans, according to the Delhi proposals, agreed to joint electorates with reservation of seats, provided Sind was constituted a separate province and Reforms were introduced in the N. W. F. Provinces and Baluchistan. The proposals met with mixed reception.

The proposals were, however, formally accepted by the All-India Congress Committee which met in Bombay, not without mental reservations on the part, perhaps, of every one concerned. More contentious than this was the issue of

political unity which Mr. Iyengar had set himself to establish.

In the latter half of the year the Congress Working Committee so modified the Assam Congress resolution that not only did uniform opposition to the ministry cease to be Congressmen's duty but the question whether Congressmen should support or oppose the ministry was also left to be decided by the Congress parties in the Legislatures concerned. This was too much for the die-hards who requisitioned a special meeting of the All-India Congress Committee, but did not press the issue for which the meeting was called. The meeting, however, was rendered lively by the feeling that was generated by the consideration of the conclusions arrived at by the Unity Conference held at the same place earlier. There was a bitter debate marked by a walk-out, several amendments and numerous points of order. Ultimately the resolutions were ratified and the "era of communal peace" hailed—but almost simultaneously riots broke out at Gaya! As a result, conversions and reconversions were to be allowed and so were music before mosques and cow sacrifice—subject, of course, to conditions

All this talk and quarrel about the internal affairs of the Congress were set at rest by the non-inclusion of Indians on the personnel of the **Royal Commission on Indian Reforms.** Most of the leaders fancied that it would be an insult to India if Indians were not appointed members of the Commission. Even moderates reputed for their sobriety and reasonableness affected extremism. The Viceroy endeavoured —but in vain—to explain the position to the leaders of the land (See Year Book of 1928).

Congressmen were firm. With boycott of the Commission, communal unity and constitution making as their war-cry, Congressmen met at Madras during Christmas under the presidency of Dr. M. A. Ansari.

On the communal question the Congress adopted a resolution which stipulated the introduction of joint electorates with reservation of seats, the constitution of Sind, Karnatak, Andhra and Utkal as separate provinces and the introduction of Reforms in the N. W. F. Provinces. On the question of music outside mosques and cow slaughter each community was asked to respect the other's feelings without prejudice to the rights of the respective communities. Of course the Congress decided on a thorough boycott of the Commission including hartals and mass demonstrations. As expected, the Working Committee was asked to draft a Swaraj constitution in consultation with other bodies and to place it before a National Convention to be convened at Delhi not later than March 1928. By far the most spectacular of the resolutions was that which declared the goal of the Indian people to be complete national independence which was carried after considerable opposition.

Congress in 1928.

The activities of the Congress in 1928 constitute an epoch. It was in that year that for the first time the politicians of the country co-operated, under the aegis of the Congress, to produce a draft constitution for the future governance of the land. It was also in that year that the Congress gave birth to an institution which threatened, and is still threatening, to eclipse the parent body. Again it was in 1928 that the Congress adopted in its open session at Calcutta a resolution declaring specifically, though conditionally, that Dominion status would be acceptable to India. This, it will be recalled, marks a return to 1908 when, soon after the Surat split, it was stated that the objects of the Congress were, among other things, "the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire." Since this declaration of faith over a score of years ago the Congress has been drifting farther and farther from practical politics : it adopted complete non-co-operation; then practised a restricted form of that negative doctrine ; discarded it altogether ; resolved to boycott the Parliamentary Commission ; and lastly, in 1927, set independence as the goal of India. From this there was a reaction which found expression in the Calcutta resolution.

Early in the year Sir John Simon and his colleagues on the Indian Statutory Commission landed in India to carry out a preliminary survey of their field of inquiry In pursuance of the resolutions adopted by the premier political institutions of the country hostile demonstrations were organised at the various places visited by the Commissioners. The demonstrators, however, were mostly students led by professional politicians whose efforts did not prevent welcome addresses being presented to the distinguished visitors in the name of the masses—the Muslims, the "untouchables", the labouring classes and the agriculturists. Thus, in spite of the "boycott," the Commission had a triumphant tour through the country in the earlier half of the year when the Parliamentarians studied the life, the people, their manners and customs, their needs and desires.

The boycotters strove hard to reduce the work of the Commission to a farce, if not to make it impossible altogether, and towards this end sought to wreck the machinery by means of which the inquiry was intended to be conducted. Congressmen and their allies in the various provincial Legislative Councils tried their best to get the Council to refuse to co-operate in the inquiry ; but the majority in every province—except the Central Provinces—was for co-operation. Committees were set up by everyone of these Councils to sit with the Commission as it toured each province, taking official and non-official evidence. The Central Legislature, unfortunately, struck a discordant note. The Lower House resolved to non-co-operate. The elders chose their representatives and the only way to secure representation for the popular chamber was for the Viceroy to nominate representative members to constitute, in conjuction with those of the Council of State, the Central Legislative Committee to work in collaboration with the Simon Commission in the statutory inquiry.

The failure of the boycott reminded Congressmen of the next duty which the Madras session had imposed on them, namely, the drafting of a "Swaraj" constitution for India. This they set out to do about the middle of the year when

representatives of almost all political organisations met in Bombay at the invitation of the Congress executive. Dr. M. A. Ansari, the Congress President, presided on the occasion and declared the readiness of Congressmen to co-operate with others in drafting a constitution "as a reply to Lord Birkenhead's challenge". The All Parties Conference—for that it was in a real sense—appointed a representative committee to undertake the task. The Committee was presided over by Pandit Motilal Nehru, the veteran Congressman and Swarajist, and included Sir Tej Bahadur, the Liberal leader, and Sir Ali Imam.

The Committee consulted various leaders in the country and after two or three months' hard labour produced a document, which, however, instead of being an all parties' report, evoked more controversy than any other proposal in recent years regarding the future of India. In the words of the report itself: "There were two formidable difficulties in the way of complete or even substantial unanimity. The first arose from the difference in the general outlook of the Congress and that of the other organisations, the former having at its last (Madras) session adopted a resolution declaring independence as its goal and the latter aiming at Dominion status; the second arose from the widely differing angles of vision from which the various communal organisations viewed their political rights." These words hold good even now.

The Committee declared there was no half-way house between the present hybrid system and reponsible government (which it held to be identical with Dominion status) and demanded its immediate introduction following the abolition of the India Office and the transference of power from the British to the Indian voter. The question of defence, communal dissensions in the country, the special social conditions of India and the position created by the existence of Indian States were all dismissed by the Committee as comparatively unimportant considerations. The control of the army was to be transferred to the responsible Indian Government. The communal problem could be settled by the abolition of separate electorates and the introduction, if necessary, of reservation of seats for majorities as well as minorities in the legislatures of the land only for a period of ten years. In regard to the Indian States, the Committee provided that all treaties made between the East India Company and the Indian States and all such subsequent treaties, so far as they would be in force at the commencement of the "Commonwealth of India Act" should be binding on the "Commonwealth"; the "Commonwealth" should exercise the same rights in relation to, and discharge the same obligations towards, the Indian States as the Government of India exercised and discharged previous to the passing of "this Act". In cases of disputes between the "Commonwealth" and Indian States, the matter should be referred to a Supreme Court to be constituted.

The question of Indian States, it may be mentioned in passing, came into prominence as the result of the inquiry conducted by the Committee set up by the Government of India under the Chairmanship of Sir Harcourt Butler in regard to the relations of the States and their rulers with the Government of India. The recommendations of the Nehru Committee in this behalf served to give a foretaste of what the plenary session of the Congress did later, namely, to lift the ban placed on the Congress on interference in the affairs of Indian States and their people. Following this vital change in creed—which gave official Congress approval to what in many cases was mischievous propaganda carried on in Indian States by British Indian politicians the Congress demanded the introduction of responsible government in Indian States.

To return to the Nerhu Report. Apart from the opposition of Sikhs and Muslims, a large section of Congressmen themselves expressed dissatisfaction at the moderate tone of the report which recommended the acceptance of Dominion status in substitution of independence which the Madras Congress had set as the goal of Congressmen. Many Congressmen declared that, in spite of the protests to the contrary of the authors of the report, it was intended for the Commission with which they were professing to non-co-operate. The principal objection came from Madras. Messrs. Srinivasa Iyengar, ex-President, Subhas Chandra Bose, ex-detenu, and Pandit Jawaharlal Nehru were the leaders of this movement against the Nehru Report on the ground that it went back on the Madras Congress resolution.

Meanwhile, the Commission, which had gone to England after its preliminary tour, returned and commenced regular inquiry in October. Even the little boycott that prevailed earlier in the year disappeared and the inquiry went on smoothly, except for slight disturbances at Lahore and in the U.P. At the former place the mob broke down a fence erected by the police and threatened to overwhelm the latter who charged the crowd. In the scuffle some of the leaders, including Lala Lajpat Rai, M.L.A., ex-Prsesident of the Congress, was assaulted. The Lala died subsequently of heart failure, but Congressmen were not slow to make political capital out of his death and affirmed that he succumbed to the injuries inflicted on him by the police.

As the year drew to a close and the annual session of the Congress approached, a fierce controversy raged over the Nehru Report. The advocates of complete independence and true Muslim leaders, who were alarmed at the light-heartedness with which the report had dismissed their community's interests, were the loudest in declaiming it. It was in this atmosphere that the All Parties' Convention met at Calcutta, a few days prior to the annual meeting of most of the political organisations in India, for the purpose of receiving and considering the All Parties' Committee's report. The Convention adopted the proposal that India should have the same constitutional status in the community of nations known as the British Empire as the Dominions of Canada, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa and the Irish Free State, with a Parliament having powers to make laws for peace, order and government of India and an executive responsible to that Parliament. Prohibition was included in the articles of the constitution; and the proposal of the Nehru Committee safeguarding the liberties of all persons

and guaranteeing all personal and private properties in the future commonwealth was carried after a heated debate. The Convention agreed that the future Parliament of India should be free to retaliate if any other part of the Empire placed any disabilities on Indians. It was laid down that the grant of full responsible government in Indian States was necessary before they could be assigned a place in free federal India.

The Convention, however, failed to find a solution acceptable to all for the communal question. The matter was referred to a Committee, which, although it held an all-night sitting, failed to reach agreement, with the result that the Mahomedan spokesmen left the meeting in disgust. The question again came up before the open session of the Convention. Mr. Jinnah, on behalf of the Muslims, agreed to accept joint electorates and adult franchise, provided one-third of the number of seats in the Central Legislature was reserved for Muslims and residuary powers were vested in the Provincial Governments. The Convention refused to agree to these two demands, although on other minor points the Muslim claims were conceded. The Muslims were thus sorely disappointed. And so were the Sikhs, who, on the other hand, objected to communalism being made the basis of any future constitution and affirmed that if that were done they would withhold their support from the Nehru Report. Their spokesman made a lengthy statement and walked out of the Convention pandal as a protest.

It was resolved eventually that "except on points on which notes of dissent have been recorded at the instance of some parties present, the Nehru Report marks general agreement on the basis of a solution of the communal problems." The Convention then adjourned *sine die* "to meet when necessary to complete its work."

It was proposed at first that the Congress Working Committee should summon the Convention at a later date, but Mrs. Besant raised a significant objection. She pointed out that the Congress was only one of the parties to the Convention and that the latter was a body independent of the Congress. She had, as a matter of fact, for some time previously, been striving to make the Convention a permanent institution inasmuch as it represented the largest measure of agreement among all political parties, while the Congress was later becoming narrower and narrower. The talk of independence and the inclusion later in the main resolution of the Congress of a threat to revive non-co-operation made her firmer in her resolve to perpetuate the Convention. Indeed, Mrs. Besant, although an ex-President of the Congress, openly declared her intention to dissociate herself from Congress activities and to propagate the cult of Dominion status in the name of the All Parties' Convention.

With Mrs. Besant, the Liberals and the bulk of Muslim opinion opposed to the idea of independence and the left wing of the Congress opposed to anything less extreme than that, the position of Pandit Motilal Nehru, the President of the Congress, and others of his view of thinking was very unenviable. True, that when he was elected President Pandit Nehru, in the words of Mrs. Besant, resigned the honour and sought re-election with the Nehru Report in his hand and was again returned triumphantly. But by no means did this circumstance influence the Leftists who continued their opposition to the Dominion status ideal with renewed vigour and were determined to wreck it in the open Congress. It was no wonder, therefore, that Pandit Nehru, in his presidential address to the Congress, blew hot and cold in the same breath. He said: "I am for complete independence—as complete as it can be—but I am not against full Dominion status—as full as any Dominion possesses it to-day, provided I get it before it loses all attraction, I am for severance of British connection as it subsists with us to-day, but I am not against it as it exists with the Dominions." He held that Dominion status involved a very considerable measure of freedom bordering on complete independence which was any day preferable to complete dependence. He put to himself three questions: Where do we stand? What is our destination? How can we reach the destination? Answering the first, he declared that Indians were handicapped by two serious disabilities, one imposed by the foreign rule and the other of their own making. One making the removal of the other impossible. He pleaded for united action to get out of this vicious circle. As for the second question, he said: "Our destination is freedom, the form and extent of which will depend upon the time when, and the circumstances under which, it comes." The means of achieving this end, of course, was to adopt the Nehru scheme. He urged that religion be divorced from politics, warned the country against socialism, appealed for social reorganisation, the removal of untouchability and the elevation of women and made a fervent appeal to the Congress to open its doors wide and "admit the nation which is knocking at your door.'

The Congress was divided into three camps; the advocates of complete independence led by Mr. Iyengar (for some time), Mr. Subhas Chandra Bose and Pandit Jawaharlal Nehru, son of the President; those who wanted Dominion status and nothing beyond that, led by Mrs. Besant; and Pandit Nehru sandwiched between the two, with one foot in either camp. The "Independents" denounced the others as seeking to convert the Congress into a moderate organisation, while Mrs. Besant declared that the Leftists were heading for ruin. This was just the opportunity for which Mr. Gandhi had, apparently, been waiting, and he staged a come-back at the psychological moment. He threw in his weight with Pandit Nehru and sponsored a compromise formula which primarily served his purpose. Although the Belgaum Congress formally put an end to the non-co-operation movement and although since then Mr. Gandhi hed been staying in the political background, he had been waiting for a chance to make a re-entry into active political life and revive his pet theory of non-violent non-co-operation. The astute politician that he is, he effectively exploited this opportunity. While adhering to the goal of independence, he was prepared to accept the Nehru constitution, on condition that the Congress would be free to revive non-co-operation if Dominions status were not granted.

This satisfied neither wing. Mr. Iyengar walked out of the Working Committee of the Congress as a protest against the compromise resolution. Mr. Gandhi first proposed to fix December 31, 1930, as the time limit for the acceptance of the Nehru constitution and suggested that a copy of the resolution be forwaded to the Viceroy. To this Pandit Jawaharlal Nehru moved an amendment repudiating Dominion status and advocating severance from "British imperialism." Mr. Gandhi and Pandit Nehru threatened to leave the Congress to Mr. Iyengar and his followers if the latter persisted in their attitude, whereupon another effort was made to effect a compromise. This time a quarrel arose as to whether the Nehru Report should be "approved" or "adopted", and Mr. Gandhi declared "This diplomacy stinks in my nostrils." Although the second draft deleted the portion asking the President to forward the resolution to the Viceroy, it did not meet with all-round approval. A third resolution was then drafted reducing the time limit to one year. This Mr. Iyengar agreed to support but the other "Independencewallahs" were opposed to it. The final resolution approved of the Nehru Report as a great step in political advance and, whilst adhering to the Madras resolution on independence, the Congress was prepared, subject to the exigencies of the political situation, to adopt the Nehru constitution, if it was accepted by the British Parliament before the expiry of 1929; and if that did not happen the Congress would revive non-violent non-co-operation; Congressmen could, in the meanwhile, carry on propaganda for independence. Mr. Gandhi pointed out that Dominion status was not inconsistent with the sort of independence desired by Indians of all parties; but amendments were moved in the open Congress, one of which accepted only the political solution of the report, another only the communal solution, while a third was Communist in tone. Eventually, however, the motion was carried by majority of 1,300 to 900.

Mr. Gandhi's re-entry into politics was signalised by a resolution which asked Indians to adopt in cases of specific grievances the kind of civil disobedience and non-payment of taxes practised by the people of Bardoli taluka in Gujerat as a protest against the revised land assessment. It was also resolved to boycott foreign cloth, use khaddar, remove untouchability and carry on village reconstruction, with a view to devising sanction for enforcing the Nehru demands.

The National Liberal Federation.

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (*vide* 1919 edition of this book) witnessed the birth of the National Liberal Federation which has, since then, been the platform of Indian moderate leaders. It held its first session in Bombay in 1918. Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress.

Those who had held the Federation in high esteem for its moderation, sobriety and balanced judgment suffered a rude shock in 1927 when the Liberal body and its leading lights proved the saying, "If you scratch a Liberal you will find an extremist." Liberal leaders bade good-bye to their avowed principle of co-operation with the Government when they expressed themselves in favour of a boycott of the Royal Commission on Indian Reforms on the ground that there was no Indian on it.

Thenceforward Liberal politics became negative and barren, and leaders who had enjoyed a reputation for sane-thinking came to be regarded as the "wild men" of the Congress. Boycott was the breath of their nostrils, although they were declaring now and then that the door wat still open for Government to "make a gesture co-operation". Their monotonous stagnation was, however, slightly relieved by the efforts at constitution making undertaken at the instance of the Congress. Liberals heartily co-operated in this endeavour and attended the All Parties Conference summoned by the Congress in the middle of the year. Sir Tej Bahadur Sapru, President of the Liberal Federation, consented to serve on the Committee appointed by the Conference to draft a constitution for India. After months of toil the Committee produced a constitution according to which Inda would enjoy the status of the Dominions of the British Empire. The report also offered a solution for the communal dissensions and a formula to govern the relations between British India and the Indian States. It was, in a sense, a Liberal document, for the Liberals were the only group of men in the country who unanimously and unreservedly accepted the entire report, while a comparatively small, but none the less vocal, section of Congressmen and the bulk of Muslims were opposed to the main recommendations of the Committee. It was no wonder, therefore, that the Liberals who took part in the All-Parties Convention, which met at Calcutta before the Congress to consider the report, accorded their whole-hearted support to the scheme, which, with minor changes, was adopted by the Convention.

The 1928 Session.—After the main work of the Convention had been completed the Liberals held their annual meeting of the Federation at Allahabad on the last day of the year under the Presidency of Sir Chimanlal Setalvad. "I venture to think, said" Sir Chimanlal in his address to the Federation, "that every reasonable mind

should accept the goal of Dominion status. Dominion status meets all national aspirations and carries with it the protection, safety and other advantages of partnership in the most powerful Empire in the world." He pointed out the inconsistency of the Congress compromise resolution on Dominion status which contained a threat to revive non-co-operation, with a view to achieving independence,after a certain period, if Dominion status was not conceded by the British. Sir Chimanlal added that those who affirmed independence as their goal could not be honest believers in Dominion status and that those who believed in Dominion status within the Empire could not countenance such an ultimatum. He gave a list of the services done to the country by the Liberals and accused the Government of non-co-operating with them, adding that Government was responsible for creating extremism in the land by "blundering and hesitating policy." He considered that a declaration of rights and the securing of all property rights were essential in any future constitution and drew attention to the menace of communism which is threatening not only the ordered progress of the country but the very foundations of society and the State. Therefore "it behoves Government and all right-thinking men to take all measures to stop this exploitaion and misleading of the masses for revolutionary purposes, before it is too late." Sir Chimanlal advocated full provincial autonomy with the transfer of all provincial subjects (including law and order) to ministers. An element of responsibility should be introduced in the Central Government and, though this meant the introduction of dyarchy, it would work satisfactorily with goodwill.

The Federation then adopted a resolution asking for Dominion status for India immediately, as "any further delay and postponement is fraught with danger to the mutual relations of India and England." Another resolution approved of the Nehru constitution including provincial autonomy and the vesting of residuary powers with the Central Government. A committee was appointed to co-operate with any other organisation to arrive at a formula, in addition to, or in substitution of, the Nehru solution, for the settlement of communal differences. The Federation urged the introduction of Reforms in Indian States and welcomed the proposal to arrange for representatives of British India and Indian States to meet and discuss their respective points of view with a view to arriving at a settlement acceptable to both.

An insight into the real state of mind of the Liberals at present was furnished by the concluding remarks of the President of the Federation who issued a grave warning to Government. The trusteeship of England, he declared, was coming to an end. Britian had to deal with a people who had attained majority and were demanding from the so-called trustees their property and also asking for accounts. The British must change their mentality and must realise the mentality that was growing in the country, which, if not guided properly, would swallow everything. "It will swallow Dominion status and even British connection and British trade. If Government does not heed our voice and take our modest counsel into consideration, Heaven only knows what the consequences will be."

The Moslem League.

The All-India Moslem League came into being in 1906 out of the universal desire among leading Mussalmans at that time for an effective organisation to protect their communal interests. With a view to secure separate Muslim representation in the legislative bodies of the land under the Minto-Morley scheme of constitutional reforms then under discussion, Indian Moslems who had been hitherto keeping aloof from politics organised the League. Its original objects were the promotion of loyalty to British Government, the protection of political and other rights of Mussalmans and to place their needs and aspirations before Government in temperate language and to promote inter-communal unity without prejudice to the other objects of the League. Moslem opinion slowly advanced: and in 1913 the securing of self-government within the British Empire was included in the objects. The League was a powerful and influential body in 1916 and 1917, and what is known as the Lucknow pact of communal representation arrived at between the League and the Congress in 1916 was bodily incorporated in the Government of India Act, 1919. The birth of the Khilafat Committee however overshadowed the League which from 1919 had almost disappeared till April 1923 when it met for a brief period under the presidentship of the late Mr. Bhurgri, but had to be adjourned for want of a quorum. In 1924, however, some influential Moslem leaders like Mr. M. A. Jinnah thought that the Khilafat Committee's functions having ceased in view of the Turkish deposition of the Khalifa decided to revive the League which met under Mr. Jinnah's chairmanship at Lahore in May 1924. The Lahore session practically did nothing else save to reorganise the scattered branches of the League.

The League in 1923-27.—The 1925 and 1926 sessions of the League were noted for their virility. The Muslims displayed greater allegiance to their communal organisation in proportion to the loyalty of the Hindus to their Maha Sabha. Suspicion and distrust, enmity and open hostility began to prevail between the two communities. Proportionate distribution of the loaves and fishes of office, on the political side, and the questions of the Hindus playing music before mosques and the Mahomedans killing cows, on the religious side, constituted the points of difference which frequently led to inter-communal riots. The situation was regarded with grave concern by serious minded leaders, some of whom, under the leadership of Mr. Jinnah, met at Delhi early in 1927 and offered, in the name of the Muslims, to surrender their right to communal electorates, provided, among other things, Sind was constituted into a separate province and reforms were introduced in the N. W. Frontier Provinces and Baluchistan. This offer, however, was acceptable neither to the Hindus nor the Muslim masses who insisted on the continuance of the separate electorates. A schism set in the Muslim League which was accentuated by the announcement of the personnel of the Statutory Commission on Indian Reforms. The non-inclusion of Indians on the Commission was construed by a certain section of the Muslims as an insult to India; and those who held this view decided to boycott the Commission. The majority of the community, however, thought otherwise and saw great advantages in co-operating in the Parliamentary inquiry and placing before the Commission the demands of the community. Both sections strove to capture the League. The venue of the session was an important factor, and it was thought that if it were held at Lahore, which was the stronghold of the pro-Commissioners, the decision would go against the anti-Commissioners; so the latter manœuvred to hold the session at Calcutta. This was achieved by means of a series of irregularities in procedure which were resented by the Punjab section. The split in the League became definite with the holding of two sessions, one at Lahore which decided to co-operate with the Commission and the other at Calcutta which voted for boycott.

The two sections drifted further and further notwithstanding efforts at approchement made from time to time. The cleavage in the League became permanent, so that those who differed from it and at the same time desired to formulate the views of the entire community with regard to the future constitution of India had to call a separate conference outside the League. The report of the Committee of the All Parties Conference indicated the direction in which the wind was blowing, and the Muslims could not with prudence allow their claims to go unrepresented. The League was no more representative of the entire community, hence the birth of the All Parties Muslim Conference.

The 1928 Session.—The League—or what was left of it after the secession by the Shafi school—met at Calcutta in 1928. Its position was by no means enviable. On the one hand, a rival organisation was being formed in the shape of the All Parties Conference which bade fair to become a permanent body, while the Congress and the All Parties Convention treated the League with scant courtesy. The League session opened with the speech of the President, the Maharaja of Mahmudabad, and concluded after reaching a decision not to co-operate with the All Parties Muslim Conference. The Maharaja of Muhmudabad declared that India's membership of the British Commonwealth gave her a place of undoubtable security and asked whether India could conceive of isolation at a time when Indian nationalism was in an ascent stage. They would have to pass through laborious decades before they reached sturdy manhood, he added. He favoured the Nehru Report in its entirety and advised the League to send its delegates to confer with leaders of other parties and organisations in the Convention with a view to arriving at a settlement of the communal problems. The Subjects Committee of the League followed his advice and sent 20 delegates to the Convention, but to no purpose. Despite Mr. Jinnah's powerful exhortation and Sir Tej Bahadur Sapru's warning, the Convention spurned the Muslims' demand for the reservation of two-thirds the number of seats in the Assembly for Muslims and the vesting of residuary powers in the provinces. The final act of estrangement came when Mr. Jinnah walked out of the Committee of the Convention after a futile endeavour to reach a settlement on the communal question. The League again met, decided to non-co-operate with the All Parties Muslim Conference and adjourned *sine die*, empowering the Council of the League to call a session of the League not later than May 1929.

The All Parties Muslim Conference.—The publication of the Nehru Report hastened the advent of the All Parties Muslim Conference. As one of the speakers remarked, every provision of the report meant some disadvantage to the Muslims and some advantage to the Hindus. The Conference was called to counter-act the effect of the Nehru Report and to formulate the Muslim community's demand in regard to the future constitution of India. By no means was this an easy task; for notwithstanding the refusal of the Jinnah Leaguers to participate in the proceedings, the Conference was attended by almost all the prominent Muslim leaders of the country, including a very large number of the members of the Councils and the Assembly. Although all were determined to maintain the cultural entity of the Muslims intact and to voice Muslim claims with a united voice, there were certain irreconcilable elements whom it was difficult to bring to agree to a common formula. There was ready agreement on the unsuitability of the Nehru Report, but difference of opinion prevailed with regard to the goal of India. Persons like Mr. Mahomed Aii stood for complete independence and, of course, for the boycott of the Commission; while Sir Mahomed Shafi, who had a very large following, favoured co-operation with the Commission in the framing of a constitution within the Empire. Things wore a gloomy aspect for a while, but, thanks mainly to the tact of the President, the Aga Khan, a compromise was reached whereby the mention either of "Dominion status" or "Independence" was omitted from the resolution put before the Conference which demanded merely "a federal constitution". Simiarly it referred neither to the Simon Com-

and large Indian States and groups of smaller States when they join the federation. Every constituent member of the federation should possess plenary powers within its jurisdiction and should have its own legislature and Governor elected by itself. The residuary powers of the federation should rest with the constituent members.

The Calcutta session of the Khilafat Conference was marked by one of the worst schisms that have ever prevailed among the Khilafatists. Although this did not manfest itself in the open session of the Conference, the differences none the less burst out into a free fight at a meeting of the Bengal Committee held to elect delegates to the Conference. As the Bengal Committee was known to be in favour of the Nehru Report the "Independencewallahs" sought to influence the voting for the election of delegates which resulted in great confusion and the manhandling of more than one. Different versions of the incident are current but it seems certain that the trouble arose in consequence of the Ali Brothers "invading" the meeting with a large following.

A few days after the Conference was over disturbances broke out across the North-Western Frontier leading to the abdication of Amanullah whom the Mussulmans of India had learnt to regard as the "King of Islam." They had fondly hoped that Muslims all over the world could be brought together under this new "Khalifa," but it was not to be. They had, therefore, to rest content with expressing sympathy for Amanullah and offering, if the Government of India permitted them to do so to help Amanullah regain his throne.

The Indian Legislature.

His Excellency the Viceroy's address formally inaugurating the Winter Session of the Indian Legislature at Delhi on 2nd February 1928 was more than usually important because of its special reference to the approaching visit of the Statutory Commission. It was almost wholly devoted to that subject. It had, he said, been freely said that His Majesty's Government had done Indians injustice by denying them adequate means to bring Indian influence to bear upon the proceedings of the Inquiry, but such charges arose in part from failure to appreciate features of the scheme which he thought had already sufficiently plainly been stated :

"Apart from such misapprehensions, I am free to admit that the question of whether or not better means could have been devised for associating Indian opinion with the Inquiry which Parliament is bound to undertake is one on which every man is entitled to hold his own view. But though Indian leaders have the right, if they wish, to say that His Majesty's Government have chosen the wrong method of such association (of Indians in the inquiry), they are not at liberty if they desire to retain the character of true counesellors of the people or of honest controversialists to say that His Majesty's Government have not sought means and I would add very full and very unprecedented means of placing Indians in a position to take an ample share with them in the evolution of their country's future."

The Viceroy went on to point out that in such matters the mere form of procedure was of secondary importance. "It is well to remember that constitutional forms are nothing but instruments in the hands of men, responding to the skill of the craftsman as the plain chisel in the hand of the expert sculptor. And as men are greater than the instruments they use, we gravely err if we suppose that complaint, however loud, of the tools which circumstance has placed in our hands, will suffice to induce posterity to hold us guiltless if in the result our workmanship whether through lack of will or of capacity is found wanting. Whatever men may be tempted to think at the present moment, I dare predict that the searching inquest of history will not fail to return judgment against those who sought to use their power to hinder when it was in their power to help."

His Excellency turned to the common statement that His Majesty's Government had deliberately insulted India by excluding Indians from the personnel of the Commission. Honour and self-respect, he said, are not enhanced by creating affronts in our imagination where none in fact exists. "In the present case, British statesmen of all parties have stated in terms admitting of no misconception that the appointment of a Parliamentary Commission was in no way intended as any affront to India. Time and again this assertion has been repeated and I would ask in all sincerity by what right do leaders of Indian opinion, who are as jealous as I am of their own good faith, and would resent as sharply as I any refusal to believe their word, impugn the good faith and disbelieve the plain word of others."

"The Commission," said the Viceroy, "has been appointed with the assent and co-operation of all British parties. They will carry through their Inquiry with, it is hoped, the generous assistance of all shades of Indian opinion. But whether such assistance is offered or withheld, the inquiry will proceed and a report will be presented to Parliament on which Parliament will take whatever action it deems appropriate."

The political spirit which His Excellency in this address endeavoured to dispel brooded over the proceedings of most of the session.

The first official business was the formal introduction of a new **Reserve Bank of India**

Bill. The first Bill of this nature was introduced in the preceding Simla session. The endeavour of a section of the House to secure political representation upon the Bank's directorate led to protracted negotiations and eventually Government found to passage of the measure impossible. During the winter, the Finance Member (Sir Basil Blackett) visited London and thereafter drew up a new Bill which was calculated to meet the reasonable views of all parties concerned. How to proceed with the new measure without delay was problematical, because the original Bill had not formally been withdrawn. Government, being anxious to consult the best wishes of the Assembly and its President, adopted the plan of leaving the old Bill alone and gazetting the new one, so that it might be proceeded with at the earliest possible moment in the new session. It was, in fact, put down on the Order Paper for introduction on the day preceding the Viceroy's inaugural speech.

When the Bill was reached on the Order Paper, the President first called on Mr. Aney, a Mahratta member, who had given notice of a point of order. The latter said the course taken by Government was derogatory to the dignity of the House even though it might technically be legal. There was some discussion, in the course of which the Secretary in the Legislative Department in a long speech showed that under the Rules of the House and in accordance with precedent the proposed procedure was in order. The President, in a long written statement, said the first question was whether the method adopted so violated the proprieties of the House as to constitute an abuse of its forms and procedure. The second point, he said, was whether the procedure proposed was barred by the rule against repetition. He held that the method chosen would not be repetition but violated the proprieties of the House and was an abuse of its procedure, wherefore he declined to call upon the Finance Member to introduce his Bill.

Government thereupon decided to proceed with their original Bank Bill and its consideration was again taken up, together with a large number of amendments. The debate continued nearly three days and a motion for postponement *sine die* was then adopted *nom con*, it having been moved by a non-official member and the Finance Member intimating that if the House desired adjournment he was willing.

The Army Secretary moved consideration of a Bill to amend the **Indian Territorial Force Act** in accordance with the proposals of the Auxiliary and Territorial Force Committee. There was little debate and on the motion of a non-official member the measure was sent to Select Committee. The same course was followed in regard to the Auxiliary Force Amendment Bill, similarly arising. Both Bills were later, without substantial amendment, passed into law. The Army Secretary also moved reference to Select Committee of a Bill to provide for the application of the British Naval Discipline Act to the **Indian Navy.** This was the piece of legislation required to fulfil the conditions necessary to the formal conversion of the Royal Indian Marine into the Royal Indian Navy with right to fly the White Ensign. A member of the Congress party immediately opposed the motion on the ground that expenditure on the new Navy would not be under control by the Assembly. There was considerable debate and the motion was rejected by 55 votes to 54. The effect of the rejection is that the plan for the constitution of the new fighting force is not incommoded, but that as the force will not be under a Discipline Act corresponding with that of other portions of His Majesty's naval forces it will not have the right to fly the White Ensign or to be termed Royal Indian Navy.

The **Statutory Commission** on February 6th addressed to H. E. the Viceroy a letter the main purport of which was to invite the Indian Legislature to elect a Central Committee of co-operation with them in their Inquiry. Lala Lajpat Rai, leader of the Nationalist Party in the Assembly, moved on 16th February a recommendation "that the present constitution and scheme of the Statutory Commission are wholly unacceptable to this House and that this House will therefore have nothing to do with the Commission at any stage and in any form." The debate lasted two days and apart from Government's efforts to encourage a spirit of moderation and reasonableness was mainly characterised by division of opinion between Hindus and Muslims and on the part of the former the strong assertion of the non-co-operation theory which has been the hall mark of the Swaraj Party led by Motilal Nehru since before the inauguration of the Montagu-Chelmsford Reforms. From the Muslim standpoint Sir Zulfiqar Ali Khan moved to the original resolution an amendment declaring "that the procedure put forward by the Indian Statutory Commission merits the favourable consideration of this Assembly." The President at the conclusion of the debate first put the Resolution to the vote and it was adopted by 68 votes to 62.

An outstanding feature of the debate was a speech by Pandit Motilal Nehru reaffirming his position of non-co-operation. He said that his party would at the outset have omitted the word "present" appearing at the beginning of Lala Lajpat Rai's resolution (as quoted above). He argued that the Congress was not concerned with this man or that man, but took its stand upon the broad principle "that Parliament and the British public and the British Government have no shadow of a right to force a Constitution upon us against our will." Doubtless, he said, so long as India was held in her present complete subjection, Britain and Parliament could enforce their will at the point of the bayonet: "but when you talk of giving a measure of freedom to the subject nation, it is hypocrisy, it is dishonesty, to rely upon laws to which that people were not parties, to rely upon those laws, to restrict the limits within which such measure of liberty is to be given." The Pundit asserted that "Congress stands to-day for complete independence." He showed how he had at various times in the Assembly brought forward statements and resolutions on the subject and he added :

"The Congress met and with due regard to all that had happened it definitely and clearly laid down that its goal was complete indepen-

dence. By that I stand and I say by that the whole country stands. It is true that various constitutions have been suggested and various parties talk of Dominion status, by which is understood the kind of Government which prevails in Canada, in South Africa, in Australia and in the Free State of Ireland. Now, I want it to be clearly understood that while the Congress stands for complete independence, it is fully prepared to consult and confer with all the other parties concerned, including the Government, as to the kind of constitution which is to be framed and which is suitable to the circumstances. Now, it is clear that however complete the independence may be there must be some transition period and some transitory provisions to apply to that period. When I say that all parties in India are agreed upon complete independence I mean that when some talk of Dominion status and things like that, all that is meant by them is that that would be only a kind of transitional constitution in order to attain to the goal of independence."

He further said: "My Party has no desire whatever to consult any extraneous body as to what that constitutional is going to be except in so far as the interests of that body itself may be involved and for that purpose we are ready to negotiate, we are ready to enter into arrangements, for the protection of British as well as any other interests that there may be in this country . . . . . . Our position is that we gain our independence whenever it has to come, in the near or distant future, not by the aid of the British Government or through Parliament but by self-determination and by our own strength. That is the decision of the Congress . . . . . ."

The same subject came under discussion in the Council of State on February 22nd when two resolutions were moved, the first and original resolution being by Mr. P. C. D. Chari and recommending the appointment of a Committee to co-operate with the Statutory Commission subject to certain conditions and the other, in the form of an amendment by Sir Maneckji Dadabhai, recommending its appointment according to the conditions offered in Sir John Simon's letter of February 6th. The main feature of the debate was a powerful speech by Sir Sankaran Nair, formerly member of the Viceroy's Executive Council, who said it could not be questioned that Parliament was the final arbiter in the matter, that the formation of a Committee would give Indian politicians a superb chance to put forth their views both to Parliament and to the whole world and that the arguments put forward in support of the boycott of the Commission were the most convincing reasons why the Committee of Co-operation should be appointed. The resolution to appoint a Committee to co-operate on the terms laid down by the Statutory Commission was adopted by 34 votes to 13.

The annual **Railway Budget** was presented by the Hon. Sir George Rainy, Railway Member, in the Legislative Assembly and by the Hon. Sir Austin Hadow, Chief Commissioner for Railways, in the Council of State, on 20th February. It showed that on the final figures for the past year total receipts on commercial lines were estimated at Rs. 103½ crores or nearly Rs. 5 crores higher than in the preceding year and expenditure Rs. 90 2/3 crores, an increase of Rs. 1½ crores, or a little less than the increase in interest charges during the same period. The surplus of receipts over expenditure was estimated at Rs. 12¾ crores, as against Rs. 9 in the Budget and of that strategic railways absorbed Rs. 1 2/3 crores, Rs. 4¾ crores went to the railway reserve fund and the contribution to general revenue was left at Rs. 6⅓ crores.

For the ensuing year, Government proposed reductions in 3rd class fares, in parcels and luggage charges and in four classes of goods rates, namely on kerosine, on manure and oilcake, on jagri and on grain, pulses and oilseeds—all heads selected with special concern for the interests of the poorer classes and agriculturists. Allowing for these changes, the Budget for 1928-29 showed estimated receipts of Rs. 103 crores, total charges Rs. 93 crores, surplus Rs. 9 crores, contribution to revenues Rs. 5½ crores and contribution to railway reserve fund Rs. 3½ crores.

Sir George Rainy emphasized the benefit which both railways and the general Budget had received from the separation of railway accounts from general accounts and showed that his Department had instituted special investigations in that regard with a view to the review of the separation arrangement which was due to come in the ensuing year if the Assembly desired it.

The debates on the Budget were of the customary semi-political tenor, heavily stressed points being control by the Assembly, alleged racial distinctions in the subordinate departments and the demand for rapid Indianisation of the superior railway services.

The **annual general Budget**, the last to be prepared by the Hon. Sir Basil Blackett, was submitted to the Assembly by him and to the Council of State by the Financial Secretary on 29th February. The final accounts for 1926-27 showed a surplus of Rs. 296 lakhs against the revised estimate of Rs. 282 lakhs. The concluding year having shown general trade improvement, the final revised estimates Budget showed revenue and expenditure both at Rs. 125·26 crores, or within Rs. 3 lakhs of the original estimates. The Budget proposals for the ensuing year showed on the existing basis of taxation a revenue of Rs. 132·23 crores, including Rs. 258 lakhs of unremitted Provincial Contributions, but not including any assistance from the revenue reserve fund, and expenditure Rs. 129·60 crores, leaving a surplus of Rs. 263 lakhs, which Government regarded as recurrent. Out of this, the Budget provided for the sacrifice of Rs. 253 lakhs for the final extinction of Provincial Contributions, a step which would thus leave a net surplus of Rs. 5 lakhs.

A special feature of the Budget was the satisfactory Ways and Means statement which it contained. In the five years since 31st March 1913, when the era of post-war deficits ended, unproductive debt was diminished by Rs. 76 crores. The aggregate debt increased by Rs. 113 crores, the net result of this reductiou and of an increase of Rs. 1,89 crores in productive debt. The Finance Department hoped

mission nor to the Nehru Report, but insisted on compliance with the demands of the Conference by any agency which devised a constitution.

The outstanding features of the Conference were its representative and influential character and the Presidential address. The latter was a concise but a forcible statement which emphasised the resolve of the community to maintain its cultural entity. His Highness pleaded for closer contact between the leaders of the Muslim community and the masses, so that the opinions of the latter might be correctly understood and given effect to. The Aga Khan also pleaded for tolerance in respect of cow killing and pointed out that the practice was not enjoined by Islam. "Certainly there is no need to parade sacrificial rites. The flesh and blood of animals do not reach God," he added. The speech produced great effect and the whole session impressed the delegates so well that a proposal was seriously mooted to make the Conference a permanent organisation. If this is accomplished, the Muslim League will have a serious rival.

The Khilafat Committee.

The Central Khilafat Committee owed its origin to the reticence shown by the All-India Congress Committee in 1920 to the question of the Khilafat and Non-co-operation. Messrs. Gandhi and Shaukat Ali started this organisation with a view to educative propaganda throughout the country and, if possible, to capture the Congress. The object of the Committee was stated to be the righting of the Khilafat "wrongs." As a result of intensive propaganda mainly led by Mr. Gandhi himself, prominent Indian publicists supported the view that the Indian Moslems being deeply concerned over the "exploitation of the Holy places of Islam," had a right to expect the Hindus to help them in securing their rights. Soon after, the Madras Khilafat Conference under the chairmanship of Mr. Shaukat Ali unfolded a programme of progressive non-co-operation and appealed to the country for support. The Khilafat Committee, with the huge funds at its disposal, was able to draft in a large number of delegates to the Calcutta special Congress in 1920 when the non-co-operation programme was accepted by that body with two more objects added to it, namely, the obtaining of Swaraj and the righting of the Punjab wrongs.

With the deposition of the Khalifa by the Kemalists and the revival of the Moslem League, the Committee's activities have been considerably restricted. Recently the Committee sent a deputation to Nejd to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Committee to Turkey, the Turkish Government did not quite like the idea which had consequently to be abandoned.

The 1925 session of the Khilafat Conference was rendered lively by Mr. Hazrat Mohani whose speech strongly criticising Sultan Ibn Saud was subsequently expunged. The resolution adopted by the conference under the Presidentship of Mr. Abdul Kalam Azad condemned the British policy in Iraq and the League's decision on Mosul and declared that if the Turks went to war on the latter issue the Conference would deem it its duty to help them.

Since then one heard little about the public activities of the Committee, although many of its domestic quarrels engaged the attention of the public. Funds, however, continued to be collected for the "activities" of the Committee which could hardly be specified. Things dragged on until the latter half of 1927, when the leaders found the Khilafat organisation a useful tool for purposes of their propaganda for boycotting the Statutory Commission on Indian Reforms. This was successfully achieved by the extremist wire-pullers at Madras in 1927.

In the next year, however, a peculiar situation arose as the result of the publication of the Nehru Report. This document raised many controversial issues. Its two main recommendations, namely, Dominion status for India and joint electorates with temporary reservation of seats, were not acceptable to the Khilafatists whose ideal was an extreme type of nationalism coupled with rank communalism. They wanted complete independence for India and in the same breath demanded the continuance of separate electorates. This state of mind found expression at the annual session of the Khilafat Conference which met in 1928 at Calcutta.

Mr. Mahomed Ali, who presided, launched a bitter attack on his political opponents, the Nehru school, and affirmed that the Nehru Report had given birth to dissensions in the country to an unparalleled degree. He drew attention to the unseemly quarrel that was going on between Nehru the father and Nehru the son over the Dominion status versus Independence issue and evoked warm enthusiasm among his hearers by declaring that the father might be responsible for the son dangling on the gallows.

A resolution declaring Independence as the goal of India was carried by the Conference, the mover remarking that Dominion status was a form of slavery. Another demanded that the future constitution of India should be so framed as to provide for a federation of "free and united states of India." The federation should consist of fully autonomous provinces of India

and large Indian States and groups of smaller States when they join the federation. Every constituent member of the federation should possess plenary powers within its jurisdiction and should have its own legislature and Governor elected by itself. The residuary powers of the federation should rest with the constituent members.

The Calcutta session of the Khilafat Conference was marked by one of the worst schisms that have ever prevailed among the Khilafatists. Although this did not manfest itself in the open session of the Conference, the differences none the less burst out into a free fight at a meeting of the Bengal Committee held to elect delegates to the Conference. As the Bengal Committee was known to be in favour of the Nehru Report the "Independencewallahs" sought to influence the voting for the election of delegates which resulted in great confusion and the manhandling of more than one. Different versions of the incident are current but it seems certain that the trouble arose in consequence of the Ali Brothers "invading" the meeting with a large following.

A few days after the Conference was over disturbances broke out across the North-Western Frontier leading to the abdication of Amanullah whom the Mussulmans of India had learnt to regard as the "King of Islam." They had fondly hoped that Muslims all over the world could be brought together under this new "Khalifa," but it was not to be. They had, therefore, to rest content with expressing sympathy for Amanullah and offering, if the Government of India permitted them to do so to help Amanullah regain his throne.

The Indian Legislature.

His Excellency the Viceroy's address formally inaugurating the Winter Session of the Indian Legislature at Delhi on 2nd February 1928 was more than usually important because of its special reference to the approaching visit of the Statutory Commission. It was almost wholly devoted to that subject. It had, he said, been freely said that His Majesty's Government had done Indians injustice by denying them adequate means to bring Indian influence to bear upon the proceedings of the Inquiry, but such charges arose in part from failure to appreciate features of the scheme which he thought had already sufficiently plainly been stated :

"Apart from such misapprehensions, I am free to admit that the question of whether or not better means could have been devised for associating Indian opinion with the Inquiry which Parliament is bound to undertake is one on which every man is entitled to hold his own view. But though Indian leaders have the right, if they wish, to say that His Majesty's Government have chosen the wrong method of such association (of Indians in the inquiry), they are not at liberty if they desire to retain the character of true counesellors of the people or of honest controversialists to say that His Majesty's Government have not sought means and I would add very full and very unprecedented means of placing Indians in a position to take an ample share with them in the evolution of their country's future."

The Viceroy went on to point out that in such matters the mere form of procedure was of secondary importance. "It is well to remember that constitutional forms are nothing but instruments in the hands of men, responding to the skill of the craftsman as the plain chisel in the hand of the expert sculptor. And as men are greater than the instruments they use, we gravely err if we suppose that complaint, however loud, of the tools which circumstance has placed in our hands, will suffice to induce posterity to hold us guiltless if in the result our workmanship whether through lack of will or of capacity is found wanting. Whatever men may be tempted to think at the present moment, I dare predict that the searching inquest of history will not fail to return judgment against those who sought to use their power to hinder when it was in their power to help."

His Excellency turned to the common statement that His Majesty's Government had deliberately insulted India by excluding Indians from the personnel of the Commission. Honour and self-respect, he said, are not enhanced by creating affronts in our imagination where none in fact exists. "In the present case, British statesmen of all parties have stated in terms admitting of no misconception that the appointment of a Parliamentary Commission was in no way intended as any affront to India. Time and again this assertion has been repeated and I would ask in all sincerity by what right do leaders of Indian opinion, who are as jealous as I am of their own good faith, and would resent as sharply as I any refusal to believe their word, impugn the good faith and disbelieve the plain word of others."

"The Commission," said the Viceroy, "has been appointed with the assent and co-operation of all British parties. They will carry through their Inquiry with, it is hoped, the generous assistance of all shades of Indian opinion. But whether such assistance is offered or withheld, the inquiry will proceed and a report will be presented to Parliament on which Parliament will take whatever action it deems appropriate."

The political spirit which His Excellency in this address endeavoured to dispel brooded over the proceedings of most of the session.

The first official business was the formal introduction of a new **Reserve Bank of India**

Bill. The first Bill of this nature was introduced in the preceding Simla session. The endeavour of a section of the House to secure political representation upon the Bank's directorate led to protracted negotiations and eventually Government found to passage of the measure impossible. During the winter, the Finance Member (Sir Basil Blackett) visited London and thereafter drew up a new Bill which was calculated to meet the reasonable views of all parties concerned. How to proceed with the new measure without delay was problematical, because the original Bill had not formally been withdrawn. Government, being anxious to consult the best wishes of the Assembly and its President, adopted the plan of leaving the old Bill alone and gazetting the new one, so that it might be proceeded with at the earliest possible moment in the new session. It was, in fact, put down on the Order Paper for introduction on the day preceding the Viceroy's inaugural speech.

When the Bill was reached on the Order Paper, the President first called on Mr. Aney, a Mahratta member, who had given notice of a point of order. The latter said the course taken by Government was derogatory to the dignity of the House even though it might technically be legal. There was some discussion, in the course of which the Secretary in the Legislative Department in a long speech showed that under the Rules of the House and in accordance with precedent the proposed procedure was in order. The President, in a long written statement, said the first question was whether the method adopted so violated the proprieties of the House as to constitute an abuse of its forms and procedure. The second point, he said, was whether the procedure proposed was barred by the rule against repetition. He held that the method chosen would not be repetition but violated the proprieties of the House and was an abuse of its procedure, wherefore he declined to call upon the Finance Member to introduce his Bill.

Government thereupon decided to proceed with their original Bank Bill and its consideration was again taken up, together with a large number of amendments. The debate continued nearly three days and a motion for postponement *sine die* was then adopted *nom con*, it having been moved by a non-official member and the Finance Member intimating that if the House desired adjournment he was willing.

The Army Secretary moved consideration of a Bill to amend the **Indian Territorial Force Act** in accordance with the proposals of the Auxiliary and Territorial Force Committee. There was little debate and on the motion of a non-official member the measure was sent to Select Committee. The same course was followed in regard to the Auxiliary Force Amendment Bill, similarly arising. Both Bills were later, without substantial amendment, passed into law. The Army Secretary also moved reference to Select Committee of a Bill to provide for the application of the British Naval Discipline Act to the **Indian Navy.** This was the piece of legislation required to fulfil the conditions necessary to the formal conversion of the Royal Indian Marine into the Royal Indian Navy with right to fly the White Ensign. A member of the Congress party immediately opposed the motion on the ground that expenditure on the new Navy would not be under control by the Assembly. There was considerable debate and the motion was rejected by 55 votes to 54. The effect of the rejection is that the plan for the constitution of the new fighting force is not incommoded, but that as the force will not be under a Discipline Act corresponding with that of other portions of His Majesty's naval forces it will not have the right to fly the White Ensign or to be termed Royal Indian Navy.

The **Statutory Commission** on February 6th addressed to H. E. the Viceroy a letter the main purport of which was to invite the Indian Legislature to elect a Central Committee of co-operation with them in their Inquiry. Lala Lajpat Rai, leader of the Nationalist Party in the Assembly, moved on 16th February a recommendation "that the present constitution and scheme of the Statutory Commission are wholly unacceptable to this House and that this House will therefore have nothing to do with the Commission at any stage and in any form." The debate lasted two days and apart from Government's efforts to encourage a spirit of moderation and reasonableness was mainly characterised by division of opinion between Hindus and Muslims and on the part of the former the strong assertion of the non-co-operation theory which has been the hall mark of the Swaraj Party led by Motilal Nehru since before the inauguration of the Montagu-Chelmsford Reforms. From the Muslim standpoint Sir Zulfiqar Ali Khan moved to the original resolution an amendment declaring "that the procedure put forward by the Indian Statutory Commission merits the favourable consideration of this Assembly." The President at the conclusion of the debate first put the Resolution to the vote and it was adopted by 68 votes to 62.

An outstanding feature of the debate was a speech by Pandit Motilal Nehru reaffirming his position of non-co-operation. He said that his party would at the outset have omitted the word "present" appearing at the beginning of Lala Lajpat Rai's resolution (as quoted above). He argued that the Congress was not concerned with this man or that man, but took its stand upon the broad principle "that Parliament and the British public and the British Government have no shadow of a right to force a Constitution upon us against our will." Doubtless, he said, so long as India was held in her present complete subjection, Britain and Parliament could enforce their will at the point of the bayonet: "but when you talk of giving a measure of freedom to the subject nation, it is hypocrisy, it is dishonesty, to rely upon laws to which that people were not parties, to rely upon those laws, to restrict the limits within which such measure of liberty is to be given." The Pundit asserted that "Congress stands to-day for complete independence." He showed how he had at various times in the Assembly brought forward statements and resolutions on the subject and he added:

"The Congress met and with due regard to all that had happened it definitely and clearly laid down that its goal was complete indepen-

dence. By that I stand and I say by that the whole country stands. It is true that various constitutions have been suggested and various parties talk of Dominion status, by which is understood the kind of Government which prevails in Canada, in South Africa, in Australia and in the Free State of Ireland. Now, I want it to be clearly understood that while the Congress stands for complete independence, it is fully prepared to consult and confer with all the other parties concerned, including the Government, as to the kind of constitution which is to be framed and which is suitable to the circumstances. Now, it is clear that however complete the independence may be there must be some transition period and some transitory provisions to apply to that period. When I say that all parties in India are agreed upon complete independence I mean that when some talk of Dominion status and things like that, all that is meant by them is that that would be only a kind of transitional constitution in order to attain to the goal of independence."

He further said: "My Party has no desire whatever to consult any extraneous body as to what that constitutional is going to be except in so far as the interests of that body itself may be involved and for that purpose we are ready to negotiate, we are ready to enter into arrangements, for the protection of British as well as any other interests that there may be in this country . . . . . . Our position is that we gain our independence whenever it has to come, in the near or distant future, not by the aid of the British Government or through Parliament but by self-determination and by our own strength. That is the decision of the Congress . . . . . ."

The same subject came under discussion in the Council of State on February 22nd when two resolutions were moved, the first and original resolution being by Mr. P. C. D. Chari and recommending the appointment of a Committee to co-operate with the Statutory Commission subject to certain conditions and the other, in the form of an amendment by Sir Maneckji Dadabhai, recommending its appointment according to the conditions offered in Sir John Simon's letter of February 6th. The main feature of the debate was a powerful speech by Sir Sankaran Nair, formerly member of the Viceroy's Executive Council, who said it could not be questioned that Parliament was the final arbiter in the matter, that the formation of a Committee would give Indian politicians a superb chance to put forth their views both to Parliament and to the whole world and that the arguments put forward in support of the boycott of the Commission were the most convincing reasons why the Committee of Co-operation should be appointed. The resolution to appoint a Committee to co-operate on the terms laid down by the Statutory Commission was adopted by 34 votes to 13.

The annual **Railway Budget** was presented by the Hon. Sir George Rainy, Railway Member, in the Legislative Assembly and by the Hon. Sir Austin Hadow, Chief Commissioner for Railways, in the Council of State, on 20th February. It showed that on the final figures for the past year total receipts on commercial lines were estimated at Rs. 103½ crores or nearly Rs. 5 crores higher than in the preceding year and expenditure Rs. 90 2/3 crores, an increase of Rs. 1½ crores, or a little less than the increase in interest charges during the same period. The surplus of receipts over expenditure was estimated at Rs. 12¾ crores, as against Rs. 9 in the Budget and of that strategic railways absorbed Rs. 1 2/3 crores, Rs. 4¾ crores went to the railway reserve fund and the contribution to general revenue was left at Rs. 6½ crores.

For the ensuing year, Government proposed reductions in 3rd class fares, in parcels and luggage charges and in four classes of goods rates, namely on kerosine, on manure and oilcake, on jagri and on grain, pulses and oilseeds—all heads selected with special concern for the interests of the poorer classes and agriculturists. Allowing for these changes, the Budget for 1928-29 showed estimated receipts of Rs. 103 crores, total charges Rs. 93 crores, surplus Rs. 9 crores, contribution to revenues Rs. 5½ crores and contribution to railway reserve fund Rs. 3¼ crores.

Sir George Rainy emphasized the benefit which both railways and the general Budget had received from the separation of railway accounts from general accounts and showed that his Department had instituted special investigations in that regard with a view to the review of the separation arrangement which was due to come in the ensuing year if the Assembly desired it.

The debates on the Budget were of the customary semi-political tenor, heavily stressed points being control by the Assembly, alleged racial distinctions in the subordinate departments and the demand for rapid Indianisation of the superior railway services.

The **annual general Budget**, the last to be prepared by the Hon. Sir Basil Blackett, was submitted to the Assembly by him and to the Council of State by the Financial Secretary on 29th February. The final accounts for 1926-27 showed a surplus of Rs. 296 lakhs against the revised estimate of Rs. 282 lakhs. The concluding year having shown general trade improvement, the final revised estimates Budget showed revenue and expenditure both at Rs. 125·26 crores, or within Rs. 3 lakhs of the original estimates. The Budget proposals for the ensuing year showed on the existing basis of taxation a revenue of Rs. 132·23 crores, including Rs. 258 lakhs of unremitted Provincial Contributions, but not including any assistance from the revenue reserve fund, and expenditure Rs. 129·60 crores, leaving a surplus of Rs. 263 lakhs, which Government regarded as recurrent. Out of this, the Budget provided for the sacrifice of Rs. 253 lakhs for the final extinction of Provincial Contributions, a step which would thus leave a net surplus of Rs. 5 lakhs.

A special feature of the Budget was the satisfactory Ways and Means statement which it contained. In the five years since 31st March 1913, when the era of post-war deficits ended, unproductive debt was diminished by Rs. 76 crores. The aggregate debt increased by Rs. 113 crores, the net result of this reductiou and of an increase of Rs. 1,89 crores in productive debt. The Finance Department hoped

before the end of the new financial year almost to liquidate the debt due to the five years of revenue deficits—1918-23; and anticipated that if the present rate of progress could be maintained the unproductive debt would altogether vanish in about 12 years.

The Budget debates in the Assembly were, as usual, the occasion of considerable political demonstration, but the Budget and the taxation proposals for the ensuing year were passed without substantial change.

Among other noteworthy legislation dealt with during the Budget session were sundry tariff matters of greater or less general importance.

AUTUMN SESSION.

The annual autumn session of the Legislature commenced in Simla on 4th September and continued until the afternoon of 25th September. Three main items of business arose, namely, the appointment of a Committee to co-operate with the Statutory Commission, the submission by Government to the Legislative Assembly of a Bill authorising the expulsion of immigrant communist agitators and the question of the creation of a separate Assembly Secretariat. Another question of importance was a Bill by Rai Saheb Harbilas Sarda for the prevention of child marriages, on which the Select Committee report came before the Assembly.

The Government of India decided, in consultation with the chairman of the Statutory Commission, that the Central Committee to co-operate with the Statutory Commission should consist of nine members of whom three should be elected by the Council of State. The Council of State elected Sir Sankaran Nair, Sir Arthur Froom and Nawab Ali Khan, there being keen competition for places and a number of candidates standing. The parties on the Left of the Assembly showing no desire to elect members from that House, the Viceroy nominated five members to the Committee from it. Their names are Sir Zulfikar Ali Khan, Dr. E. A. Suhrawardy, Sir Hari Singh Gour, Rao Bahadur M. C. Rajah, Mr. Kikabhai Premchand. His Excellency further nominated Sardar Bahadur Shivdev Singh Uberoi, a member of the Council of State, to represent the Sikhs. Government appointed Sir Sankaran Nair, chairman of the Committee, which commenced its sittings forthwith.

Government in presenting to the Legislative Assembly their Bill for the expulsion of immigrant **Communist Agitators** who aimed at the destruction of the political, social or economic organisation of the country asserted their judgment that a dangerous situation had arisen and that drastic measures were necessary satisfactorily to meet it. The principal feature of their Bill was the provision of special powers for executive action. The Congress Party led opposition to the measure at every stage, Pundit Motilal Nehru and Mr. Srinivasa Iyengar, both of whom had recenty visited Moscow, strongly denouncing the measure and what was described as the propaganda against communism. The leader of the Nationalist party and his followers appeared to think that the dangerous doctrines of communism would never attract support in India and that to exclude the preaching of communism would be to refuse hospitality to ideas from other parts of the world. The leader of the Independent party opposed the measure on the ground that to assent to it would be to provide Government with an argument for obtaining similarly drastic new executive powers against Indians. The Muslim elected members were almost solidly for the Bill and Muslim members of the Independent party left it on that account. The Bill was referred to Select Committee by a small majority vote but on the motion that the Select Committee's report be taken into consideration a division resulted in a tie and the President gave a casting vote against the Bill on the ground that it was an extraordinary measure which should not be allowed to pass unless its promoters obtained a clear majority.

The President read a lengthy statement setting out his views in favour of the establishment of a **Separate Secretariat for the Legislative Assembly** and his reasons for disagreeing with the objections raised by Government to some of its particulars, especially to the proposal that the new Department should be placed directly under the administrative charge of the President. Government two days later replied with a statement showing their side of the case and published their Despatch to the Secretary of State in the matter. This document showed that in principle Government agreed with the President's proposal and favoured its early adoption but that they disagreed on the question of administration. There followed certain private conferences between the President and Party leaders, including the Home Member as leader of the House. Then followed a debate which showed a general measure of agreement in the plan of placing the administration of the new department directly under H. E. the Viceroy but subject to the condition, suggested in certain quarters, that the main burden of dealing with the separate secretariat staff and with questions connected with it should be undertaken by the Public Services Commission (H. E. the Viceroy in an address to the Assembly on 28th January 1929 announced that, with the sanction of the Secretary of State, a settlement had been reached on those lines and the new Secretariat was instituted in time for the 1929 Budget session.)

Rai Saheb Harbilas Sarda's Bill for the prevention of **Child Marriages** was in its original form confined to Hindus and merely provided that child marriages should not be valid. The Select Committee extended it by making it cover all communities and altered it by inserting provisions making the solemnisation of child marriages or participation in their solemnisation, a criminal offence. These changes aroused considerable new opposition in addition to the earlier widespread opposition of orthodox Hindus. The Muslims largely objected to the Bill being extended to their community on the ground not that they desire child marriages or make them but that some provisions of the new measure conflict with their religious law. There arose the general objection to endeavouring a social reform of the kind desired by legislation. The debates on the Bill were not completed by the end of the session, so that the final conclusion of the matter stood over.

Sport.

1928 was a year of progress for Sport in India-a definite move towards the better control of the various branches having taken place. Previously only Racing was controlled in the real sense of the word but at the end of 1928 there were Associations in being which were looking after the interests of Cricket, Hockey, Boxing, Football and Athletics. Things are still far from being satisfactory, when compared with Continental countries or America for instance, but a distinct advance has been made. The Indian Board of Cricket Control with its several Provincial Control Boards should help the "King of Games" to take a big step forward and the time may not be far distant when India will be taking part in Test Matches. The good a proper organisation can do for any game is reflected in the success of the Indian Hockey Team which won the Olympic Games tournament, the first Olympic honour India has won. Provincial Hockey Associations are now in being and the game should make further progress. Another sporting organisation which came into being during 1928 is the Railway Sports Association, which will look after, and encourage sports among the employees of India's vast railways and a successful football and boxing tournament was held.

Football has two local Associations at Bombay and Calcutta which looks after the game in the Bengal and the Bombay Presidencies but there is still room for more and an All India Federation would improve matters considerably. The main tournaments of the year, the I.F.A. Shield, the Durand, Rovers and Lahore Trades Cups were all very successful.

Amateur Boxing is making great strides, especially in the Bombay Presidency and in the Army but so far there is no All India controlling body. The professional side of the sport is still left to individual promoters but there are signs that a governing body may come into being. It will be all for the good of the game.

Athletics are looked after, to a certain extent, by the Indian Olympic Council but though there are a few Provincial Associations athletics, as a sport, will not make headway till more and better equipped grounds are available. Several of the big centres realise the necessity for Stadiums in which athletics, and other sports could be staged and perhaps, in the near future, they will make their appearance. India sent a team to Amsterdam for the Olympic Games and though no material success was registered a lot of valuable lessons were learned.

Tennis Booming.

Tennis continues to boom and the various tournaments all over the country were well supported. In the Davis Cup too, India did very well indeed and the signs are that in the near future India will be a force to be reckoned with in tennis circles. The various big tournaments in India, however, overlap somewhat and it is a pity that this should be so. Somehow the All India Championships at Allahabad do not draw the cream of India's players and the Lawn Tennis Associations might, with advantage, change the venue of this tournament. The Inter-Provincial contest provide valuable experience for the promising player.

Colonel Winsloe has been doing much propaganda work for the game of Rackets and a revival was noticed. Several tournaments which had been dormant for a number of years took unto themselves new leases of life and the preliminary steps towards forming an All India Rackets Associations were taken.

Rugby is a game which has limited scope in India but the tournaments held at Bombay, Poona, and Calcutta received good support. There was considerable enthusiasm in Bombay when the local fifteen won the All India tournament after a very long period, and though R. G. Hopkins could only take a somewhat depleted team to Calcutta the men rose to the occasion and brought back the trophy.

Rowing and Yachting are sports confined to the favoured few, and the growth of these two branches of sport cannot very well be expected to be great. Golf is played everywhere and all the tournaments proved very successful. One branch of sport which saw increased activity was that confined to motorists in the form of sprint speed trials and reliability tests and there is every indication that they will increase. In fact it is not improbable that 1929 will see the introduction of Dirt Track Motor Cycle Racing.

The Richest Race.

Racing all over India is popular. The Eclipse Stakes, run at Bombay, has become the richest race in the country, no less than a lakh of rupees being given as stakes. The classics, the Viceroy's and the King Emperor's Cups at Calcutta and the Byculla Cup at Bombay created the usual enthusiasm while the opening of the new Barrackpore Race Course was another event notable in the racing records of the year.

The Bombay Quadrangular cricket tournament' took additional interest this year on account of Prince Duleepsinghji ' Ranji's nephew ', who has built up a big reputation in England, playing in it, but despite his help the Hindus were beaten. The winners were the Parsis who once again have to thank their little slow left handed bowler, Jamshedji for their success. It was a victory which did not come too soon and Parsi cricket received a flip it badly needed.

Sport all over India is growing, but in every branch expert coaching is badly needed. Especially is this so in Athletics. There is a wealth of talent in India which only requires developing along the right lines, but at present the budding athlete is left to himself without the practical assistance of the old hand, which is available in other countries. When sport is properly organised, and there is a lot required in this direction yet, then perhaps India will become a force to be reckoned with on the playing fields. To show how badly such authority is needed, it is impossible to record any individual feat of any athlete as being an Indian record, because there is no ruling authority, or specified rules for such attempts, or any particular body who maintains a register for such records. It cannot be done at present unless every meeting in India is held under the same rules and with authorised officials, approved by the ruling body .

A summary of the chief sporting events in 1928 is given in the following pages.

Racing.

Bangalore.

Miller Cup. Distance about 7 furlongs.—

Hajee Sir Ismail Sait's Flintham (8st. 7lbs.) Reylands 1

Ryan's Luxmi (8st 4lbs.) Burn 2

Mr. Reynalds Peculiar (8st' 5lbs). Cooper .. 3

Mr. Patel's Blyth Bachelor (9st 1lb.) Howell 4

Won by ¾ length. Time—1 min. 28 secs

H. H. Yuvaraja of Mysore's Cup. Distance about 1 mile.—

Hajee Sir Ismail Sait's Peg Anthony 8st.) 5lbs.) Rylands 1

Mrs. M. B. White's Kilgarvan (9st. 1lb.) Aldridge 2

Messrs. Radmore and Ruthvens Martens Prodigy (8st. 5lbs.) J. McQuade .. 3

Maharaja of Mysore's Lembas (8st 2lbs.) Hill 4

Won by 1½ length. Time—1 min. 49 1-5 secs.

Barton Cup (Div. I). Distance about 7 furlongs.—

Hoosein Kadom's Woodapple (8st. 2lbs.) McQuade 1

Mr. Sheriff's Hoojaz (8st 1lb.) Rylands .. 2

Mr. Chubildas' Aasuf (8st. 8lbs.) Raymond 3

Mr. Talibs Sayyad (7st 9lbs.) Meekings .. 4

Won by 3 lengths.—Time—1 min. 41 2-5 sec.

Barton Cup (Div. II). Distance about 7 furlongs.

Syed Amin's Aradin (8st 7lbs) Havell .. 1

Mr. Murphy's Baloz (8st. 1lb.) Meekings .. 2

Lt.-Col. Hill's Samarmand (9st 1lb.) Hoyt . 3

Mahomed Burgash's Sarhan II (7st. 1lb.) Rosen 4

Won by a length. Time—1 min. 41 3-5 secs.

Hajee Sir Ismail Sait's Cup. Distance about 7 furlongs.—

His Highness the Maharaja of Mysore's Chinese Honeymoon (8st. 4lbs.) Hill .. 1

Mrs. Maconochie's Birkenhead (9st 2lbs.) Edwards 2

Mr. H. G. Gregson's Yrisshe (7st 5lbs.) M. Hoyt 3

Won by a head; 2¼ lengths ; 1 length. Time 1 min. 31 1- 5secs.

Southern India Cup. Distance about 7 furlongs.—

Messrs. Essaji and Bird's Sans Pareil (7st. 11lbs.) Stokes 1

His Highness the Maharaja of Mysore's Sunama (8st. 4lbs.) Hill 2

Messrs. Essaji and Bird's Our Laddie (8st 5lbs.) Aldridge 3

Mr. J. Murphy's Drummer Boy (10st 7lbs.) Meekings 4

Won by a head; a neck, a head. Time.—1min. 33 1-5 secs.

Krishnaiah Chetty Cup. Distance about 1 mile.—

Mr. S. Mahalla's Tiffah (7st. 9lbs.) Meekings 1

Mr. G. Ardeshir's Najmuzaman (7st 5lbs.) Rosen 2

Mr. Mahomed Burgash's Good Gold (8st 11lbs.) Hoyt 3

Mr. Abdoolla Mana's Josimos (9st) Perkins 4

Won by 1¼ lengths, a neck, ¾ length. Time—1min. 58 4-5secs.

Apollo Cup. Distance about 1¼ miles.—

Mr. Patel's Amar (9st 6lbs.) Howell .. 1

Mr. Hoosein Kadum's Wood Apple (9st 4lbs.) McQuade 2

Messrs. Essaji and Bird's Royal (7st 8lbs.) Stokes 3

Mr. Mahomed Jaffer's Palavi (8st 7lbs.) Aldridge 4

Won by a length. Time—2mins. 26 secs.

Stewards' Cup. Distance about 1 mile.—

Maharaja of Mysore's Sunama (8st 1lb.) Hill 1

Messrs. Essaji and Bird's Our Laddie (8st 2lbs.) Aldridge 2

Mr. Murphy's Drummer Boy (10st 4lbs.) Meekings 3

Lt.-Col. Hill's Osbourne (7st 5lbs.) Hoyt .. 4

Won by ½ length, ¾ length, 1¼ lengths. Time—1min. 45 secs.

Bangalore Cup. Distance about 1¼ miles.—

Messrs. Souter and Simpson's Spivis (8st 7lbs.) Edwards 1

Sir Ismail Sait's Marlin (7st 6lbs.) Stokes .. 2

Maharaja of Venkatagiri's Red Cockade (8st. 6lbs) Aldridge 3

Messrs. Souter and Simpson's White Ornament (8st. 8lbs.) McQuade 4

Won by 1½ lengths; ¾ length; 1½ lengths. Time—1min. 11 1-5 secs.

Bobbili Cup. Distance about 1½ miles.—

Mr. Talib's Sayyad (9st. 2lbs.) Howell .. 1

Mr. Talib's Tajilmulk (9st. 2lbs.) Perkins .. 2

Mr. S. B. Contractor's Subram (7st 11lbs.) Meekings 3

Messrs. Essaji and Bird's Royal (8st 10lbs.) Stokes 4

Time —2mins. 29 1-5 secs.

R. C. T. C. Cup. Distance about 1¼ miles.

Mr. A. A. R. Cope's Red Connors (8st 4lbs.) Edwards 1

Mrs. White's Kilgarvan (9st 3lbs.) Aldridge 2

Sir Ismail Satt's Peg Anthony (9st) Rylands 3

Mr. Dee's Sweet Friendship (7st 10lbs.) Cooper 4

Won by 5 lengths. Time—2 mins. 11 1-5 secs.

Madras Cup. Distance about 7 furlongs.—

Mr. Murphy's Primer (9st) Meekings .. 1

Mr. Kent's Lady Fayre (8st 3lbs.) Hoyt .. 2

Messrs. Irwin Jones and Jackson's Golconda (8st 13lbs.) Rylands 3

Mr. Annamali Chettiar's Square Draw (8st 13lbs.) Hill 4

Won by 3 lengths, 2 lengths. Time—1min. 31 secs.

Barrackpore.

Club Cup (Div. I.). Distance 1¼ miles.—

Mr. A. Curlander's Golden Pospect (8st 1lb.) Bond 1

Messrs. Edmondson Eddis and Raddior's Irish Magie (9st 3lbs.) Balfour 2

Mr. H. K. Dey's Fanos (9st 2lbs.) Ringstead 3

Hajee Sir Ismail Sait's Killarney (8st 8lbs.) Forbes 4

Won by short head; neck; 1 length. Time—2 mins. 104-5 secs.

Club Cup (Div. II.) Distance 1¼ miles.—

Messrs. Gilford and Melyees' Son gar (8st 4lbs.) Edwards 1

Mr. E. Dee's Sweet Friendship (8st 4lbs.) Cooper 2

Hon. Mr. R. Gujadhar's George's Bird (7st 12lbs.) J. Brown 3

Mr. J.D. Scott's Bluster (8st 7lbs.) Parker .. 4

Won by 3 lengths; short head; 2 lengths. Time—2mins. 12 1-5secs.

Cubitt Cup. Distance 6 furlongs. (straight).—

Messrs. Sontar and Simpon's Aggravation (7st 11lbs.) 1

Mr. H. G. Gregson's Swan (9st 3lbs.) Hutchins 2

Mr. A. Curbudar's Corhali (8st 13lbs.) Bond 3

Mr. Pennick' sDanduloo (7st 10lbs.) J. Brown 4

Won by 1 length, 2½ lengths; a head. Time.—1min. 13 3-5secs.

Barrackpore Spring Cup (Div. I). Distance 1¼ miles.—

Miss R. Prophill's Summertime (8st 9lbs.) Ringstead 1

Mr. A. Curlender's Clem (7st 11lbs.) Bond 2

Mrs. J. Mein Austine's Thundering Legion (9st 2lbs.) Edwards 3

Mr. B. E. G. Eddie's Spring Running (8st 6lbs.) Bulfour 4

Won by a neck, ½l ength, 1¼ length. Time.—2mins. 7 1-5secs. .. ..

Barrackpore Spring Cup (Div. II). Distance 1¼ miles.—

Mr. Hat's Royal Bean (8st 13lbs.) Marland 1

Mr. E. Bee's Glenbale (8st) Cooper 2

Messrs. Edmonson Edilis and Roddick's Irish Magic (7st 9lbs.) Balfour 3

Mr. T. Burridge's Work of Art (7st 13lbs.) March 4

Won by ½ length, 1¼ length; 2 lengths. Time.—2mins. 7 4-5 secs.

Bombay.

The Turf Club Cup. Distance 1¾ miles—

Mr. H. M. Mahomed's Hila-Luzzaman (9st. 7lbs.) Morris and Mr. E. L. F. De Soysa's Tiger King Dead (8st. 10lbs.) Howell .. .. heat 1

Mr. Eve's Turick (7st. 5lbs.) carried, (7st. 6 lbs.). C. Hoyt.. 3

Mr. A. M. Khairaz's Rehearsal (7st. 8lbs.) .. 4

Won by Dead heat, 1½ length; length. Time—3 mins. 181-5 secs.

The Byculla Club Cup. Distance 1¾ miles—

H. H. the Aga Khan's Astre D'or (8st.) A. C. Walker 1

Mr. M. C. Patel's Moss (9st. 7lbs.), Barnett 2

H. H. the Maharaja of Rajpipla's Melesigenes (9st. 4lbs.), Townsend 3

Mr. J. C. Galstaun's Ox Trot (7st. 4lbs.), S. Black 4

Won by ¾ length, head, neck. Time—3 mins. 3-5 secs.

The Mansfield Plate. Distance 6 furlongs—

The Calendars.

A full Calendar will be found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 3,760 years and 3 months before the beginning of the Christian Era; the year is Luni-solar.

The *Mohammedan*, or era of the Hejira, dates from the day after Mahomet's flight from Mecca, which occurred on the night of July 15, 622 A.D The months are Lunar.

The *Fasli* year was derived from a combination of the Hejira and Samvat years by the order of Akbar; it is Luni-solar. The *Bengali* year seems also to have been related at one time to the Hejira, but the fact of its being Solar made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is Luni-solar. The months are divided into two fortnights—*sudi*, or bright, and *badi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendars.

PUBLIC HOLIDAYS IN 1929.

Parsee (Shehenshahi).
